Racism and English Football Daniel Burdsey, 2020-11-19 Racism and English Football For Club and Country analyses the contemporary manifestations outcomes and implications of the fractious relationship between English professional football and race Racism we were told had disappeared from English football It was relegated to a distant past and displaced onto other European countries When its appearance could not be denied it was said to have reappeared This book reveals that this was not true Racism did not go away and did not return It was here all along The book argues that racism is firmly embedded and historically rooted in the game s structures cultures and institutions and operates as a form of systemic discrimination It addresses the ways that racism has tainted English football and the manner in which football has in turn influenced racial meanings and formations in wider society Equally it explores how football has facilitated forms of occupational multiculturalism black player activism and progressive fan politics that resist divisive social phenomena and offer a degree of hope for an alternative future Focusing on a diverse range of topics in men s and women s football at club and international level Racism and English Football extends and expands our knowledge of how racism occurs and critically how it can be challenged This is an essential read for scholars and students working on race ethnicity sport and popular culture together with those

interested in the social and organisational dynamics of English professional football more generally *CIB Proceedings 2015: Going north for sustainability: Leveraging knowledge and innovation for sustainable construction and development*

Prof. Charles Egbu, 2015 This International Conference is about sustainability in its wider sense It is an important area of discourse as it pertains to how we work and how we lead our lives while considering the lives and workplaces of future generations The conference particularly sets out to explore some of the developments and challenges taking place in academia and industry in both the Northern and Southern hemispheres The conference is entitled Going north for sustainability The North signifies progress in technology education and other areas of human endeavour to many people Progress requires that people learn across continents and cultures

Really Good Schools James Tooley, 2021-04-12 Almost overnight a virus has brought into question America s nearly 200 year old government run K 12 school system and prompted an urgent search for alternatives But where should we turn to find them Enter James Tooley s Really Good Schools A distinguished scholar of education and the world s foremost expert on private low cost innovative education Tooley takes readers to some of the world s most impoverished communities located in some of the world s most dangerous places including India and such war torn countries as Sierra Leone Liberia and South Sudan There in places where education experts fear to tread Tooley finds thriving private schools that government multinational NGOs and even international charity officials deny exist Why Because the very existence of low cost high quality private schools shatters the prevailing myth in the U S U K and western Europe that absent government affordable high quality schools for the poor could not exist But they do And they are ubiquitous and in high demand Founded by unheralded local educational entrepreneurs these schools are

proving that self organized education is not just possible but flourishing often enrolling far more students than free government schools do at prices within reach of even the most impoverished families In the course of his analysis Tooley asks the key questions What proportion of poor children is served How good are the private schools What are the business models for these schools And can they be replicated and improved The evidence is in In poor urban and rural areas around the world children in low cost private schools outperform those in government schools And the schools do so for a fraction of the per pupil cost Ubiquity affordability quality value for money equity choice and sustainability these are the seven categories by which schooling should be judged according to Tooley In every instance one is forced to conclude that low cost non governmental entrepreneurial education as practiced by the poor around the globe contains the key to their rise to prosperity and leadership positions within their own respective cultures Alarmed by recent government barriers in education Americans can now find hope in the triumph in the face of acute adversity of these remarkable schools Because of the pandemic parents in America and Europe are discovering that the education of their children is indeed possible and likely far better without government meddling with rigid seat time mandates outdated school calendars absurd age driven grade levels and worse testing regimes And having experienced the first fruits of educational freedom parents will be increasingly open to the possibilities of ever greater educational entrepreneurship and innovation Thankfully they have Really Good Schools to show the way

The Russia Scare Richard Sakwa, 2022-07-08 *The Russia Scare* assesses the scope character and extent of Russian interference in the affairs of liberal democratic states This book examines the Russia scare in a dynamic manner stressing the interaction between threat perception responses and subsequent policies What forms did this threat take what were the instruments used how effective were the deployed tools and who were the allies with whom Russia worked in these endeavours Above all what impact did interference have on target societies The book explores why Russia engaged in such activities what the probable chain of command was if any and the role of the Russian leadership in all of this as well as investigating the response of Western societies and governments The author sifts the real from the imagined which can only be achieved by establishing the larger historical context He scrutinises the fundamental question was Russia before the invasion of Ukraine in 2022 really engaged in a sustained hybrid warfare campaign to sow discord and undermine Western democracies If so what were the strategic purposes underlying such an activity Various hypotheses are analysed notably that Russian post Cold War activity is nothing exceptional in the context of great power confrontation that all great powers are engaged in one way or another in such actions and thus contextualisation is important and that Russia's subversive activity was often exaggerated even misrepresented Responses potentially amplified the elements of subversion represented by the original threat Threats exist but responses always need to be calibrated so as not to inflict self harm on the integrity of liberal democracy itself This book will be of great interest to students scholars and academics of international relations comparative politics security and defence studies global governance and Russian politics as well as politicians political advisers NGOs
