

CONJURING PROPERTY

JEREMY M. CAMPBELL

The background of the cover is a solid mustard yellow. A large, irregular shape, resembling a piece of torn paper, is cut out from the center. This shape reveals a photograph of a landscape where a fire is burning in a forest. The fire is bright orange and yellow, with thick black smoke rising into the air. In the foreground, there is a dark, dense thicket of vegetation. The sky above the fire is a pale, hazy blue. The overall composition suggests a theme of environmental destruction and its impact on property.

Pdf Conjuring Property Speculation Environmental Brazilian:

Fixing the Climate Charles F. Sabel, David G. Victor, 2024-04-02 Can the world stop climate change The prognosis is bleak Most efforts to tackle the problem have focused on treaties that require virtually global consensus yet meaningful consensus has been elusive because deep cuts in emissions are expensive and antagonize well organized interests Predictably diplomacy has swung between gridlock and superficial agreements with little impact After three decades of sustained negotiations on global warming emissions have risen by one third Stopping climate warming requires that they be cut essentially to zero Sabel and Victor look to offer a case for optimism by proposing a different strategy to recast climate change as a problem best addressed piecemeal Rather than seeking a grand global bargain they argue that the problem should be broken down into local challenges They call this concept experimentalist governance massive simultaneous searches for local solutions that are scalable to the global level with a focus not on marginal incentives for success but on penalties for repeated egregious failure The authors show through a series of cases how regulators firms farms and NGOs faced with penalty defaults are learning to solve some of the knottiest environmental problems they then propose central mechanisms that could help monitor and review progress establishing which experiments are working and establish new frontiers for experimentation While the threat of impending catastrophe has understandably made debate about climate policy increasingly shrill and polarized Sabel and Victor offer here a guide to institutional design that could finally lead to the politically and economically self sustaining reductions in emissions that thirty years of global diplomacy has not delivered

The Carbon Calculation Raquel Rodrigues Machaqueiro, 2023-03-07 The Carbon Calculation examines how climate science the policy world and neoliberalism have mutually informed each other to define the problem of climate change as one of market failure precluding alternatives to market based solutions Focusing on REDD Reducing Emissions from Deforestation and Forest Degradation the book demonstrates how industrialized countries are able to maintain their socioeconomic models largely unaltered while claiming to address global warming using forests in the Global South to offset their pollution By examining the creation and implementation of REDD historically and ethnographically the book traces the social life of this mechanism as it travels across a complex network spanning several interacting levels international national and local Through cases in the Brazilian state of Acre and the Zamb zia province in Mozambique the author demonstrates how global climate policy has created new opportunities and rationales for unprecedented levels of intervention in the Global South all under the guise of saving the planet The Carbon Calculation critically highlights the ways in which politics has reinforced a scientific focus on one possible solution to the problem of climate change namely those that largely absolve the industrialized world from undertaking politically painful transformations in its own economic model **Frontiers of Development in the Amazon** Antonio Augusto Rossotto Ioris, Rafael R. Ioris, Sergei V. Shubin, 2020-06-22 Frontiers of Development in the Amazon Riches Risks and Resistances contributes to ongoing debates on the processes of change in the

Amazon a region inherently tied to the expansion of internal and external socio economic and environmental frontiers This book offers interdisciplinary analyses from a range of scholars in Europe Latin America and the United States that question the methods of development and the range of socio ecological impacts of those methods by examining the theoretical methodological and empirical dimensions of frontier making along with evaluating and refining existing frameworks Contributors focus on the complex politics of border formation shaped by institutional economic and political forces placing them in relation to ethical imaginary and symbolic elements In doing so contributors explore the dynamic production of identities values and subjectivities covering matters of migratory patterns complex power struggles and intensive at times violent clashes Among other topics this book assesses the recent encroachment of export driven agribusiness into the Amazon Region in the context of recolonization resource exploitation and multiple programs of modernization and national integration Scholars of Latin American studies international development environmental studies and applied social sciences will find this book particularly useful
