De-mystifying Translation Lynne Bowker, 2023-02-22 This textbook provides an accessible introduction to the field of translation for students of other disciplines and readers who are not translators. It provides students outside the translation profession with a greater awareness of and appreciation for what goes into translation. Providing readers with tools for their own personal translation related needs, this book encourages an ethical approach to translation and offers an insight into translation as a possible career. This textbook covers foundational concepts, key figures, groups and events, tools and resources for non professional translation tasks and the types of translation that non translators are liable to encounter. Each chapter includes practical activities, annotated further reading and summaries of key points suitable for use in classrooms, online teaching or self study. There is also a glossary of key terms. *De-mystifying Translation: Introducing Translation to Non-translators* is the ideal text for any non specialist taking a course on translation and for anyone interested in learning more about the field of translation and translation studies. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons CC BY NC SA license. *Translating Cultures* David

Katan, Mustapha Taibi, 2021-06-17 This bestselling coursebook introduces current understanding about culture and provides a model for teaching culture to translators, interpreters and other mediators. The approach is interdisciplinary, with theory from Translation Studies and beyond, while authentic texts and translations illustrate intercultural issues and strategies adopted to overcome them. This new third edition has been thoroughly revised to update scholarship and examples and now includes new languages such as Arabic, Chinese, German, Japanese, Russian and Spanish and examples from interpreting settings. This edition revisits the chapters based on recent developments in scholarship in intercultural communication, cultural mediation, translation and interpreting. It aims to achieve a more balanced representation of written and spoken communication by giving more attention to interpreting than the previous editions, especially in interactional settings. Enriched with discussion of key recent scholarly contributions, each practical example has been revisited and/or updated. Complemented with online resources which may be used by both teachers and students, this is the ideal resource for all students of translation and interpreting as well as any reader interested in communication across cultural divides. Additional resources are available on the Routledge Translation Studies Portal <http://routledgetranslationstudiesportal.com>.

Eco-Translation Michael Cronin, 2017-01-06 Ecology has become a central question governing the survival and sustainability of human societies, cultures and languages. In this timely study, Michael Cronin investigates how the perspective of the Anthropocene or the effect of humans on the global environment has profound implications for the way translation is considered in the past, present and future. Starting with a deep history of translation and ranging from food ecology to inter-species translation and green translation technology, this thought-provoking book offers a challenging and ultimately hopeful

perspective on how translation can play a vital role in the future survival of the planet
