What We Now Know about Jewish Education Roberta Louis Goodman, Paul A. Flexner, Linda Dale Bloomberg, 2008
When *What We Know about Jewish Education* was first published in 1992 Stuart Kelman recognized that knowledge and understanding would greatly enhance the ability of professionals and lay leaders to address the many challenges facing Jewish education. With increased innovation, the entry of new funders, and the connection between Jewish education and the quality of Jewish life, research and evaluation have become over the last two decades an integral part of decision making, planning, programming, and funding.

Women's Lives around the World Susan M. Shaw, Nancy Staton Barbour, Patti Duncan Ph.D., Kryn Freehling-Burton Ph.D., Jane Nichols, 2018-01-04
Providing an in-depth look at the lives of women and girls in approximately 150 countries, this multivolume reference set offers readers transnational and postcolonial analysis of the many issues that are critical to the success of women and girls. For millennia, women around the world have shouldered the responsibility of caring for their families. But in recent decades, women have emerged as a major part of the global workforce, balancing careers and family life. How did this change happen? And how are societies in developing countries responding and adapting to women's newer roles in society? This four-volume encyclopedia examines the lives of women around the world, with coverage that includes the education of girls and teens, the key roles women play in their families, careers, religions, and cultures, how issues for women intersect with colonialism, transnationalism, feminism, and established norms of power and control. Organized geographically, each volume presents detailed entries about the lives of women in particular countries. Additionally, each volume offers sidebars that spotlight topics related to women and girls in specific regions or focus on individual women's lives and contributions. Primary source documents include sections of countries' constitutions that are relevant to women and girls, United Nations resolutions and national resolutions regarding women and girls, and religious statements and proclamations about women and girls. The organization of the set enables readers to take an in-depth look at individual countries as well as to make comparisons across countries.

Teaching for Apocalypse Meg Gorzycki, 2020-12-16
If the coronavirus does not get us, our ignorance might. The COVID-19 pandemic exposed serious gaps in Americans' education. Did education cause the outbreak? No. Did our assumptions, false narratives about the world, and our willingness to blindly accept whatever our partisan poohbahs said contribute to our woes? Perhaps. Could education be improved so we can better understand the world, nature, public health, economics, and our own government? Absolutely. During the pandemic, thousands of teachers flocked to the silicon sanctuary as shelter-in-place mandates forced schools and universities into the digital classroom. Instructors urgently wanted to know which boxes to click in their learning management systems. The how-to literature proliferated, and much of it walked a fine line between reasonable adjustments and outright abdication of high standards of academic achievement and intellectual development. A case is made here that education was in trouble long before COVID-19 appeared, and that if we do not make substantial reforms in our schools and colleges, whether online or not,

we will be at the mercy of our own ignorance as the problems of the twenty first century crash into our lives
