Snapchat Today:

Competing on Talent in Today's Business World Pradeep Sahay, 2018-07-26 It is currently an exciting time for organizations with regard to the recruitment of talent. The business and organizational pressures for finding and hiring the best people could not be greater. Recruitment has not changed as a process; a vacancy still needs a suitable hire. However, the landscape tools, technologies, behaviors, and expectations regarding how an organization approaches sourcing and acquiring talent are changing rapidly. This book chronicles one organization's journey as it goes about re-orienting the focus of its talent acquisition capability from the current reactive process to a strategic and proactive program capable of consistently sourcing and recruiting the very best people available. Forward-looking companies are seizing this opportunity to create a true competitive advantage in talent sourcing and acquisition. They are focusing on fine-tuning the fundamentals while devoting increased time and planning to the more strategic areas of talent acquisition, including workforce planning and strategic sourcing. Their best-in-class approaches elevate recruitment from a transactional short-term focused activity to a strategic integrated long-term approach that optimizes their investments in people. This book articulates both the challenges and the response options that confront organizations as they compete for talent in this fast-changing business climate. The initial sections here provide a macro view on the changing work landscape and how recent trends and developments around technology and innovation are impacting the discipline of Talent Acquisition. The book is designed as a running case study profiling the best practices in recruiting. Drawing on both primary and secondary research, it adapts and learns from the best practices of high-impact business functions such as a lean supply chain, analytics, process re-engineering, sales, and marketing, and discusses the leading academics and practitioners in this regard. As such, this book will elevate awareness and discourse on the topic and will help concretize a roadmap for organizations looking to revisit and re-invent their talent acquisition philosophies and practices as they compete for talent in today's world. **Ubuntu 24.04 LTS Server** Richard

Petersen, 2025-03-07 This book is designed as an Ubuntu 24.04 LTS Server administration and reference source covering the Ubuntu servers and their support applications. Server tools are covered as well as the underlying configuration files and system implementations. The emphasis is on what administrators will need to know to perform key server support and management tasks. Coverage of the systemd service management system is integrated into the book. Topics covered include software management, systemd service management, systemd networkd, Netplan network configuration, and Ubuntu cloud services. Key servers are examined, including Web, FTP, CUPS, printing, NFS, and Samba. Windows shares, Network support servers, and applications covered include the Squid proxy server, the Domain Name System (BIND) server, DHCP, distributed network file systems (nftables), firewalls, and cloud computing. The book is organized into five parts: getting started, services, shared resources, network support, and shells. Part 1 focuses on basic tasks such as installing the Ubuntu Live Server, configuring networking with Netplan, systemd networkd, and NetworkManager, managing software from the Ubuntu Snap, and

APT repositories and basic usage for the desktop and the command line interfaces Part 2 examines Internet servers as well as how services are managed by systemd using unit files Configuration and implementation of the Postfix mail server the vsftpd FTP server the Apache Web server as well as news and database servers are covered in detail Part 3 deals with servers that provide shared resources on a local network or the Internet Services examined include the CUPS printing server NFS Linux network file server and Samba Windows file and printing server clustering and cloud computing services supported by Ubuntu Part 4 covers servers that provide network support like the Squid proxy server the Bind Domain Name System DNS server DHCP servers and the nftables firewall along with the configuration firewall tools FirewallD and UFW IPtables is included for reference Key networking operations are also examined like IPv6 auto configuration TPC IP networking and network monitoring tools Part 5 provides a review of shell commands including those used for managing files as well as shell scripts variables and configuration files Be advised that for the servers there are very few changes from Ubuntu 22.04 but many changes for the desktop
