Wind Energy For the Rest of Us Paul Gipe, 2018-05-04 *The Green Bubble* Robert Bell, 2006

The next four years will be an increasingly frenzied lead up to a gigantic stock market bubble in renewable energy The new energy revolution will have a profound impact on everything that human beings construct move or deliberately heat or cool

The consequences of the first truly global stock market bubble will transform every country every industry and nearly every business This book will act as a road map for the new energy revolution It will serve as a guide to understanding the rapidly unfolding events as well as a business reference for individual and institutional investors and for government policy advisors The Green Bubble explains why huge global political and economic changes will occur what changes will be promoted and who will promote them in short who will gain and who will lose But after the bubble bursts most of the investors in the bubble those who did not get out in time and numbering perhaps a billion or more will have lost a material amount of their life savings Some will have invested individually others through their pension funds still others through their government s tax money and finally quite a few through ail of the above And what of the outcome A World War magnitude of invested money will actually have paid for the transformation out of oil and into renewable energy The result the climate will probably have been saved and there will be nearly limitless energy But it will have virtually no monetary value Energy will be too cheap to meter Readers of The Green Bubble will learn about the new energy revolution and will discover what works and what doesn t and why they will have to watch their investments closely especially those made by others on their behalf
