Book Moons Very Short Introduction Introductions

Clemens Wendtner

Book Moons Very Short Introduction Introductions:

Moons David A. Rothery, 2015-11-26 Proving to be both varied and fascinating moons are far more common than planets in our Solar System Our own Moon has had a profound influence on Earth not only through tidal effects but even on the behaviour of some marine animals Many remarkable things have been discovered about the moons of the giant outer planets from Voyager Galileo Cassini and other spacecraft Scientists have glimpsed volcanic activity on Io found oceans of water on Titan and captured photos of icy geysers bursting from Enceladus It looks likely that microbial life beyond the Earth may be discovered on a moon rather than a planet In this Very Short Introduction David Rothery introduces the reader to the moons of our Solar System beginning with the early discoveries of Galileo and others describing their variety of mostly mythological names and the early use of Jupiter's moons to establish position at sea and to estimate the speed of light Rothery discusses the structure formation and influence of our Moon and those of the other planets and ends with the recent discovery of moons orbiting asteroids whilst looking forward to the possibility of finding moons of exoplanets in planetary systems far beyond our own ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

The Very Short Introductions Blog Book Oxford University Press, 2014-09-01 In this free Very Short Introductions Blog Book we've gathered 30 of our VSI authors very best blog posts on topics including history politics science and more We hope you enjoy this glimpse into the passion insight and great writing that characterizes these authors and the Very Short Introductions series

Planets David A. Rothery, 2010-11-25 This Very Short Introduction looks deep into space and describes the worlds that make up our Solar System terrestrial planets giant planets dwarf planets and various other objects such as satellites moons asteroids and Trans Neptunian objects It considers how our knowledge has advanced over the centuries and how it has expanded at a growing rate in recent years David A Rothery gives an overview of the origin nature and evolution of our Solar System including the controversial issues of what qualifies as a planet and what conditions are required for a planetary body to be habitable by life He looks at rocky planets and the Moon giant planets and their satellites and how the surfaces have been sculpted by geology weather and impacts ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Warriors Of The Mystic Moons - Books 1-2 S.A. Laughlin, 2024-02-29 The first two books in Warriors Of The Mystic Moons a series of fantasy novels by S A Laughlin now available in one volume Mystic Moon Warriors After police officers John Mac MacQuinn and Kessyindra Kess Tamer enter the magical realm of Mystovia through a portal they discover a world filled with mythical creatures and demons

Embarking on a dangerous journey to save Mystovia the two soon learn the real reason why they were chosen to be brought into this magical world Uncharted Land Between After friends of Mac and Kess are thrown into another dimension the two set out to rescue them In the Land Between a world held together by magic and technology Kess quickly finds out that pure magic has a bad habit of going awry Meanwhile Mac finds himself on Earth and discovers that a malevolent demon from Mystovia has been pulled into Earth s dimension Racing against time can they find their friends and stop the demon
