

The background of the cover is a large, abstract geometric shape composed of many small triangles. The triangles are colored in shades of blue, green, and orange, creating a vibrant, multi-colored effect. The shape is irregular and organic, resembling a stylized tree or a complex network structure. The overall aesthetic is modern and technical, reflecting the theme of decision sciences.

ICEL2013-Proceedings of the 8th International Conference on e-Learning Eunice Ivala, 2013-06-27

Emerging Trends in Decision Sciences and Business Operations Avinash K Shrivastava, Sudhir Rana, 2022-08-30 This volume analyzes the rising inclusion of new and emerging technologies in business It measures the effectiveness and challenges of these tools in various aspects of strategy and decision making within small and big businesses Businesses in the competitive market must be agile and innovative to drive growth and the inclusion of technology and reliance on data science for decision making is fraught with its own set of challenges Through various case studies and analysis of trends the book explores diverse dimensions of decision science from a micro as well as macro perspective It examines the function management and implementation of new technologies like big data and AI in business operations and infrastructure highlighting their practical applications as well as the barriers to their adoption This book will be useful to scholars and researchers of management studies business management financial management business economics international business finance and marketing development studies and economics It will

also interest policymakers and practitioners in the field Application of Decision Science in Business and Management
Fausto Pedro García Márquez, 2020-03-04 Application of Decision Science in Business and Management is a book where each chapter has been contributed by a different author s The chapters introduce and demonstrate a decision making theory to practice case studies It demonstrates key results for each sector with diverse real world case studies Theory is accompanied by relevant analysis techniques with a progressive approach building from simple theory to complex and dynamic decisions with multiple data points including big data lot of data etc Computational techniques dynamic analysis probabilistic methods and mathematical optimization techniques are expertly blended to support analysis of multi criteria decision making problems with defined constraints and requirements The book provides an interface between the main disciplines of engineering technology and the organizational administrative and planning abilities of decision making It is complementary to other sub disciplines such as economics finance marketing decision and risk analysis etc FICAP-1 Proceedings Justine Hitchcock, Leo Hitchcock, Petteri Kaskenpalo, ICEL2016-Proceedings of the 11th International Conference on e- Learning
Prof. Dr. Rozhan M. Idrus and Dr Nurkhamimi Zainuddin, 2016 **Recent Trends in Decision Science and Management**
Tao-Sheng Wang, Andrew W. H. Ip, Madjid Tavana, Vipul Jain, 2020-05-07 This book discusses an emerging field of decision science that focuses on business processes and systems used to extract knowledge from large volumes of data to provide significant insights for crucial decisions in critical situations It presents studies employing computing techniques like machine learning which explore decision making for cross platforms that contain heterogeneous data associated with complex assets leadership and team coordination It also reveals the advantages of using decision sciences with management oriented problems The book includes a selection of the best papers presented at the 2nd International Conference on Decision Science and Management ICDSM 2019 held at Hunan International Economics University China on 20 21 September 2019 Research Anthology on E-Commerce Adoption, Models, and Applications for Modern Business
Management Association, Information Resources, 2021-04-16 In the next few years it is expected that most businesses will have transitioned to the use of electronic commerce technologies namely e commerce This acceleration in the acceptance of e commerce not only changes the face of business and retail but also has introduced new adaptive business models The experience of consumers in online shopping and the popularity of the digital marketplace have changed the way businesses must meet the needs of consumers To stay relevant businesses must develop new techniques and strategies to remain competitive in a changing commercial atmosphere The way in which e commerce is being implemented the business models that have been developed and the applications including the benefits and challenges to e commerce must be discussed to understand modern business The Research Anthology on E Commerce Adoption Models and Applications for Modern Business discusses the best practices latest strategies and newest methods for implementing and using e commerce in modern businesses This includes not only a view of how business models have changed and what business models have

emerged but also provides a focus on how consumers have changed in terms of their needs their online behavior and their use of e commerce services Topics including e business e services mobile commerce usability models website development brand management and marketing and online shopping will be explored in detail This book is ideally intended for business managers e commerce managers marketers advertisers brand managers executives IT consultants practitioners researchers academicians and students interested in how e commerce is impacting modern business models Decision Sciences and Technology for Globalisation (ISDSI 2008) B.S. Sahaye,Jeet N.D. Gupta,Surinder Batra,Sanjay Kumar,Sushil Kumar,2008-11-05 It is not uncommon to find books and other publications in the literature dealing individually with the subjects of decision sciences technology and globalisation However there are very few instances of books which integrate these three dimensions in an umbrella framework This publication is one such attempt This book comprises of 58 papers contributed by leading academia from universities and management institutes in India and abroad Many of the contributions have come from USA Canada UK Japan Australia New Zealand UAE Bahrain Taiwan Brazil and Mexico adding to the rich diversity of the thought processes explored in the papers Some of these papers are country specific while some others provide a transnational perspective Also while some papers provide enriched conceptual frameworks in specific disciplines building upon existing frameworks several other papers provide application oriented coverage focused at select organizations or industries further adding unique value to this book There are eight sections in the book namely Supply Chain Management Operations Management Information Systems ICT IT E Business Strategies Business Modeling Global Business Issues Challenges Marketing and Globalisation New Paradigms in Education and Globalisation The issues touched upon by various papers within each section are diverse and yet highly relevant and contemporary We believe this book would be useful not only to academia research scholars and students of various disciplines of management but also to those in the industry in India and abroad who are seeking conceptual inputs and experience sharing in their respective positions
