WHAT IS SEO:

SEO IS:

• A process of making your website more visible to search engines
• A way to get more organic traffic to your website
• A way to improve your website's ranking in search engines

SEO IS NOT:

• A one-time thing
• A magic trick
• A way to get instant results

Here are some SEO strategies:

Keyword optimization

Make a page's content more relevant to a search query. This can include using keywords in the page title, URL, meta description, H1 text, and content.

Meta descriptions

Write a short, relevant summary of the page's content that interests and informs users. This is one of the first things people see when searching for something, so it's important to optimize it to convince users to click on the result.

Link building

Get other websites to link to your website to build a network of links and strengthen its authority in search engines.

Crawling and indexing

Crawling is when Googlebot analyzes the content and code on a page, while indexing is when the page is stored, analyzed, and organized so it can appear in search results.
