How to Move Up When the Only Way is Down Judah Taub,2024-10-16 Break new ground in problem solving and decision making by learning from AI A well paid executive feels trapped in her very respected but unsatisfying job A startup founder has paying customers but knows that unless he fires them and pivots the business his startup won t make it A senior government

planner is tasked with undoing the nation's reliance on outdated infrastructure. These are all examples of individuals stuck in a Local Maximum; we've reached a peak but not the one that fulfills the highest potential. In order to move up in our pursuits, we must first move back down—a realization which can lead to frustration, decision-making paralysis, and lost opportunity. In *How to Move Up When the Only Way Is Down: Lessons from Artificial Intelligence for Overcoming Your Local Maximum*, Judah Taub draws from his perspective guiding early-stage AI startups, his years serving in military intelligence, and various experiences leading innovation throughout his career. With his off-the-beaten-path perspective, Judah shares insights into how humans can achieve better decision-making by learning how AI overcomes local maximums. What tech engineers already know is that with the rise of AI, we've developed new ways of addressing these limitations. These techniques employed to save billions of dollars for global giants like Amazon and Google are equally applicable to each of us. To show how, Judah shares a variety of real-world examples involving Olympic high jumpers, the transition of Ethiopian immigrants from gas station attendants to high-tech engineers, the evolution of playing cards into Nintendo, the development of ChatGPT, the link between wildfires and hedge fund managers, and much more. Explore how to anticipate and identify Local Maximums, how to overcome psychological Local Maximum blocks and biases, how to build skills and apply strategies to succeed in complex decision-making, how Local Maximum thinking can help overcome major global challenges. The book is equipped to benefit anyone facing complex decisions or obstacles to their personal or professional goals. *How to Move Up When the Only Way is Down* is designed to transform readers' decision-making by recognizing Local Maximums and skill-building based on lessons from AI.

How to Watch Television, Second Edition Ethan Thompson, Jason Mittell, 2020-03-31. A new edition that brings the ways we watch and think about television up to the present. We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it good or bad. Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. *How to Watch Television, Second Edition* brings together forty original essays, more than half of which are new to this edition, from today's leading scholars on television culture who write about the programs they care and think the most about. Each essay focuses on a single television show, demonstrating one way to read the program and through it, our media culture. From fashioning blackness in *Empire* to representation in *Orange Is the New Black* and from the role of the reboot in *Gilmore Girls* to the function of changing political atmospheres in *Roseanne*, these essays model how to practice media criticism in accessible language, providing critical insights through analysis, suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs, past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast, streaming, and cable. Addressing shows from TV's earliest days to contemporary online transformations of the medium, *How to Watch Television, Second Edition* is designed to engender classroom discussion among television critics of all
