THE ULTIMATE PLAN FOR THE REDEMPTION OF MANKIND JAVIER CLEMENTE ENGONGA AVOMO,2021-10-09 Humanity is an exceptional creation of God of Creation Human beings cannot destroy themselves without also destroying that part of their divinity that exists and participates in the action of bringing about the best possible future for this special world of existence God s Plan is the destiny of humanity revealed in prophecies from the remotest antiquity of human societies and whose destiny ever renewed is the Ultimate Plan of Redemption of Mankind God does not make mistakes and humanity s greatest mistake has always been to question the infallibility of its own Creator and by focusing on the errors of its own existence man has ceased to see himself as he truly is a supreme being when he chooses to be so and above all when he remembers that God lives in him All good ways lead to God while evil ways lead us away from His light and we know that every time we do wrong That is the great truth To do good is to act according to God s will or rather to walk carefully looking carefully at our steps and not looking back Javier Clemente Engonga 10 08 2021

HOW TO HACK AMAZON JAVIER CLEMENTE ENGONGA AVOMO, A computer hacker is an expert in this case in computer science who uses his technical knowledge to achieve a goal or overcome an obstacle within a computer system by non standard means Writing a book or two a day is not a very standard means and when it becomes three or two or three hundred titles you start to take it seriously especially when you see the results and the results are obvious when you see the curve growing ever upwards It s only the beginning but a few months can define a lifetime as these last two years have been for humanity as a whole We have

all learned that we are very different at the same time as we are similar in the essential that we all want to be alive Death or crisis brings out the best or the worst in us and the reality is that human beings are complex beings I do not consider myself an expert in any branch of computing I have not received any special training in anything to do with computers or computer security My computer does not even have antivirus and is open to access by what for many is a big problem because they believe in their right to privacy and do not think many times about the right of everyone of the whole world to a greater and total security This book is not to encourage or motivate anyone to do anything illegal by misunderstanding the definition of hacking In chess checkmate is the move that consists of threatening the king so that he cannot defend himself and puts an end to the game I do not know how to play table chess because my mind is that of quantum chess I didn't know it before because I didn't know neither my true potential nor that of the world inside my old computer that world which is a wonder Thank you for reading these lines Javier Clemente Engonga 07 07 2021 **Handbook of Peer-to-Peer Networking**
