Compare and Contrast

COMPARE & CONTRAST

Directions: Read both sections below. Compare and contrast the two animals.

DOLPHINS

A dolphin is a warm-blooded mammal that lives in the ocean. Dolphins give birth to babies that are called calves. They also breathe oxygen. A dolphin must live near the surface where it can breathe air. Dolphins are known to be vocal and social animals. They swim in pods where they come together with their mates to travel. Dolphins have a dorsal fin on their back, two fins on their side, and a tail. They also have a blowhole on top of their body. Their tail is horizontal and is used to swim in an up-and-down motion. A dolphin will eat things like fish, crustaceans, squid and shrimp.

SHARKS

Sharks are cold-blooded fish that live in the ocean. They spend their whole lives deep underwater. Like other fish, sharks have gills to remove oxygen from the environment. Sharks prefer to live and hunt alone. They do not like to socialize with other sharks. Sharks have a dorsal fin on their back, two fins on their side, and a tail. They also have gills on the side of their body. Their tail is vertical and is used to swim in a side-to-side motion. A shark will eat things like fish, crustaceans, squid, shrimp, other sharks, marine mammals, and plankton.
