Critical Comparisons in Politics and Culture John Richard Bowen,John Bowen,Roger Petersen,1999-10-07 Debating the problem of comparison in politics and culture this work takes up a variety of topics from nationalist violence and labour strikes to ritual forms and religious practices The contributors criticise conventional forms of comparative method and introduce new comparative strategies

Statistical Methods in Medical Research Peter Armitage,Geoffrey Berry,J. N. S. Matthews,2013-07-01 The explanation and implementation of statistical methods for the medical researcher or statistician remains an integral part of modern medical research This book explains the use of experimental and analytical biostatistics systems Its accessible style allows it to be used by the non mathematician as a fundamental component of successful research Since the third edition there have been many developments in statistical techniques The fourth edition provides the medical statistician with an accessible guide to these techniques and to reflect the extent of their usage in medical research The new edition takes a much more comprehensive approach to its subject There has been a radical reorganization of the text to improve the continuity and cohesion of the presentation and to extend the scope by covering many new ideas now being introduced into the analysis of medical research data The authors have tried to maintain the modest level of mathematical exposition that characterized the earlier editions essentially confining the mathematics to the statement of algebraic formulae rather than pursuing mathematical proofs Received the Highly

Commended Certificate in the Public Health Category of the 2002 BMA Books Competition **Iroquois Corn in a Culture-Based Curriculum** Carol Cornelius,1999-01-01 Provides a framework and an example for studying diverse cultures in a respectful manner using the thematic focus of corn to examine the Haudenosaunee Iroquois culture I See What You Mean Steve Moline,2023-10-10 Some educators may view diagrams pictures and charts as nice add on tools for students who are visual thinkers But Steve Moline sees visual literacy as fundamental to learning and to what it means to be human In Moline s view we are all bilingual Our second language which we do not speak but which we read and write every day is visual From reading maps to decoding icons to using concept webs visual literacy is critical to success in today s world The first edition of I See What You Mean published in 1995 was one of the first books for teachers to outline practical strategies for improving students visual literacy In this new and substantially revised edition Steve continues his pioneering role by including dozens of new examples of a wide range of visual texts from time maps and exploded diagrams to digital tools like smartphone apps and tactile texts In addition to the new chapters and nearly 200 illustrations Steve has reorganized the book in a useful teaching sequence moving from simple to complex texts In one research strategy called recomposing Steve shows how to summarize paragraphs of information not as a heap of interesting facts but as a diagram The diagram can then work as a framework for students to follow when writing an essay This overcomes the teacher s problem of cut and paste essays and by following their own diagram summary students have an answer to their familiar questions Where do I start What do I write next Research in Education ,1969 *Resources in Education* ,1994-07 **Designing Experiments for the Social Sciences** Renita Coleman,2018-08-27 This book is a must for learning about the experimental design from forming a research question to interpreting the results this text covers it all Sarah El Sayed University of Texas at Arlington Designing Experiments for the Social Sciences How to Plan Create and Execute Research Using Experiments is a practical applied text for courses in experimental design The text assumes that students have just a basic knowledge of the scientific method and no statistics background is required With its focus on how to effectively design experiments rather than how to analyze them the book concentrates on the stage where researchers are making decisions about procedural aspects of the experiment before interventions and treatments are given Renita Coleman walks readers step by step on how to plan and execute experiments from the beginning by discussing choosing and collecting a sample creating the stimuli and questionnaire doing a manipulation check or pre test analyzing the data and understanding and interpreting the results Guidelines for deciding which elements are best used in the creation of a particular kind of experiment are also given This title offers rich pedagogy ethical considerations and examples pertinent to all social science disciplines **Frontiers in Optics and Photonics** Federico Capasso,Dennis Couwenberg,2021-06-08 This book provides a cutting edge research overview on the latest developments in the field of Optics and Photonics All chapters are authored by the pioneers in their field and will cover the developments in Quantum Photonics Optical properties of 2D Materials Optical Sensors Organic Opto

electronics Nanophotonics Metamaterials Plasmonics Quantum Cascade lasers LEDs Biophotonics and biomedical photonics and spectroscopy Modern Proteomics - Sample Preparation, Analysis and Practical Applications Hamid Mirzaei, Martin Carrasco, 2016-12-14 This volume serves as a proteomics reference manual describing experimental design and execution The book also shows a large number of examples as to what can be achieved using proteomics techniques As a relatively young area of scientific research the breadth and depth of the current state of the art in proteomics might not be obvious to all potential users There are various books and review articles that cover certain aspects of proteomics but they often lack technical details Subject specific literature also lacks the broad overviews that are needed to design an experiment in which all steps are compatible and coherent The objective of this book was to create a proteomics manual to provide scientists who are not experts in the field with an overview of 1 The types of samples can be analyzed by mass spectrometry for proteomics analysis 2 Ways to convert biological or ecological samples to analytes ready for mass spectral analysis 3 Ways to reduce the complexity of the proteome to achieve better coverage of the constituent proteins 4 How various mass spectrometers work and different ways they can be used for proteomics analysis 5 The various platforms that are available for proteomics data analysis 6 The various applications of proteomics technologies in biological and medical sciences This book should appeal to anyone with an interest in proteomics technologies proteomics related bioinformatics and proteomics data generation and interpretation With the broad setup and chapters written by experts in the field there is information that is valuable for students as well as for researchers who are looking for a hands on introduction into the strengths weaknesses and opportunities of proteomics **Making Hands** Peter Kyberd, 2021-10-20 Making Hands The Design and Use of Upper Extremity Prosthetics provides a historical account of the development of upper extremity prostheses It describes different aspects surrounding the development of key elements of mechanisms and control for prosthetic hands and arms and includes biographical sketches of some key contributors The field is broad and uses knowledge from a wide range of disciplines Sections cover the background to give researchers and professionals what they need to learn about adjacent fields The author's expertise on the control of prostheses makes this a very comprehensive resource on the topic Covers research and technological innovation in the development of upper limb prostheses Introduces upper limb prosthetics from the different perspectives of biology engineering clinical practice and industry Discusses innovations of the recent decades rapid manufacture the citizen engineer and how these things may shape prosthetics in the future **Concept-Based Instruction** Brian Scott, 2021-09-03 Teachers and curriculum specialists are exposed to many ideas from educational leaders but it is difficult to know which ones can be transformed into meaningful learning experiences in the classroom Concept Based Instruction **Annual Report of the State Superintendent of Education of the State of South Carolina** South Carolina.
