 Alexandre Navaux, 2023-07-05 This book brings a thorough explanation on the path needed to use cloud computing
 technologies to run High Performance Computing HPC applications Besides presenting the motivation behind moving HPC
 applications to the cloud it covers both essential and advanced issues on this topic such as deploying HPC applications and
 infrastructures designing cloud friendly HPC applications and optimizing a provisioned cloud infrastructure to run this family
 of applications Additionally this book also describes the best practices to maintain and keep running HPC applications in the
 cloud by employing fault tolerance techniques and avoiding resource wastage To give practical meaning to topics covered in
 this book it brings some case studies where HPC applications used in relevant scientific areas like Bioinformatics and Oil and
 Gas industry were moved to the cloud Moreover it also discusses how to train deep learning models in the cloud elucidating
 the key components and aspects necessary to train these models via different types of services offered by cloud providers
