, 1995-11-21 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology      The Need for Speed Robert E. Litan, Hal J. Singer, 2013-01-30 The twenty first century telecommunications landscape is radically different from the one that prevailed as recently as the last decade of the twentieth century Robert Litan and Hal Singer argue that given the speed of innovation in this sector the Federal Communications Commission's outdated policies and rules are inhibiting investment in the telecom industry specifically in fast broadband networks This pithy handbook presents the kind of fundamental rethinking needed to bring communications policy in line with technological advances Fast broadband has huge societal benefits enabling all kinds of applications in telemedicine entertainment retailing education and energy that would have been unthinkable a few years ago Those benefits would be even greater if the FCC adopted policies that encouraged more broadband providers especially wireless providers to make their services available in the roughly half of the country where consumers currently have no choice in wireline providers offering download speeds that satisfy the FCC's current standards The authors recommendations include allowing

broadband providers to charge for premium delivery services embracing a rule of reason approach to all matters involving vertical arrangements stripping the FCC of its merger review authority because both the Federal Trade Commission and the Justice Department have the authority to stop anticompetitive mergers eliminating the FCC's ability to condition spectrum purchases on the identity business plans or spectrum holdings of a bidder and freeing telephone companies from outdated regulations that require them to maintain both a legacy copper network and a modem IP network These changes and others advanced in this book would greatly enhance consumer welfare with respect to telecommunications services and the applications built around them

*How Money Walks - How \$2 Trillion Moved Between the States, and Why It Matters* Travis H. Brown,2013 Between 1995 and 2010 millions of Americans moved between the states taking with them over 2 trillion in adjusted gross incomes Two trillion dollars is equivalent to the GDP of California the ninth largest in the world It s a lot of money Some states like Florida saw tremendous gains 86 4 billion while others like New York experienced massive losses 58 6 billion People moved and they took their working wealth with them The question is why Why did Americans move so much of their income from state to state Which states benefitted and which states suffered And why does it matter Using official statistics from the IRS *How Money Walks* explores the hows whys and impact of this massive movement of American working wealth Consider these facts Between 1995 and 2010 The nine states with no personal income taxes gained 146 2 billion in working wealth The nine states

with the highest personal income tax rates lost 107.4 billion. The 10 states with the lowest per capita state local tax burdens gained 69.9 billion. The 10 states with the highest per capita state local tax burdens lost 13.9 billion. Money and people moved from high tax states to low tax ones. And the tax that seemed to matter the most: The personal income tax. The states with no income taxes gained the greatest wealth while the states with the highest income taxes lost the most. Why does this matter? Because the robust presence of working wealth is the leading indicator of economic health. The states that gained working wealth are growing and thriving. The states that lost working wealth lost their most precious cargo: their tax base and the consequences are dire: stagnation, deterioration, an economic death spiral as they continue to raise taxes and lose people, businesses and working wealth. The numbers don't lie. \_\_\_\_\_ When I read *How Money Walks* I thought: It's about time. Finally we have a book that addresses one of our nation's most critical yet rarely discussed fiscal issues: the migration of working wealth as a direct result of personal income tax rates. Brown's book paints a clear portrait of where money goes and why. *How Money Walks* should be required reading for anyone who wants to understand why some states struggle to retain people and businesses while others welcome billions of new dollars each year. Dr. Arthur Laffer, Founder and Chairman, Laffer Associates and Laffer Investments, Former economic advisor to President Ronald Reagan. HWM, 2004-06. Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews. *The Hockey News ... Yearbook*, 1998. Bloomberg Markets, 2003-03. **Unavoidably Unsafe** Edward Geehr, Jeffrey Barke, 2024-07-30. An in-depth guide for parents as they struggle to make informed decisions about vaccines for their children. In *Unavoidably Unsafe*, Dr. Edward Geehr and Dr. Jeffrey Barke confront the prevailing beliefs surrounding childhood vaccines with unflinching scrutiny and bold insight. As seasoned physicians, they acknowledge the revered status vaccines hold in modern medicine while bravely questioning their safety and efficacy. From the historical triumphs of polio eradication to the complexities of modern immunization schedules, Geehr and Barke unravel the layers of vaccine development and regulation. They shed light on the unintended consequences of vaccine mandates and the erosion of informed consent in the face of mounting pharmaceutical influence. Drawing on decades of clinical experience and exhaustive research, the authors challenge conventional wisdom by addressing critical issues such as: The proliferation of childhood vaccines and their impact on public health. The National Childhood Vaccine Injury Act and its implications for vaccine safety. The symbiotic relationship between pharmaceutical companies and regulatory agencies. The shortcomings of Emergency Use Authorization and its implications for vaccine safety. The presence of potentially harmful additives in vaccine formulations. A fresh look at possible links between vaccines and autism. Cautionary considerations regarding mRNA vaccines and their suitability for children. Practical guidance for evaluating the risks and benefits of vaccines for individual children. The significance of proper informed consent and patient advocacy in vaccination decisions. *Unavoidably Unsafe* is not an indictment of vaccines but a call to arms for informed decision making and transparency in healthcare. Geehr and Barke aim to empower parents, guardians and healthcare

providers with the knowledge needed to navigate the complex landscape of childhood immunization responsibly In a rapidly evolving medical landscape where uncertainties abound Unavoidably Unsafe serves as a beacon of clarity and integrity reaffirming the importance of critical thinking and patient centered care in safeguarding the health and well being of future generations
