Computational Science and Computational Intelligence Hamid R. Arabnia, Leonidas Deligiannidis, Farzan Shenavarmasouleh, Soheyla Amirian, Farid Ghareh Mohammadi, 2025-08-09 The CCIS book constitutes selected papers accepted in the Research Track on Education of the 11th International Conference on Computational Science and Computational Intelligence CSCI 2024 which took place in Las Vegas NV USA during December 11-13, 2024. The 26 full papers included in this book were carefully reviewed and selected from a total of 155 submissions. They were organized in topical sections on subject specific education and curriculum design education and artificial intelligence teaching and learning strategies and related research studies.

Revolutionizing English Education Clarice M. Moran, 2024-04-30 Artificial Intelligence or AI has seemingly burst into public consciousness with sudden vigor. Previously relinquished to computer science journals, it erupted as the unrelenting topic of public media with most of the furor surrounding chatbots like ChatGPT. Although many educators began worrying about the implications of AI in student learning and creative activity, this book will demonstrate that AI can be harnessed as a source of inspiration and meaningful instruction. With an emphasis on useful classroom strategies as well as a consideration of the ethics of AI, this book seeks to start a conversation in this nascent area of research and practice. The primary focus is on the use of AI in the secondary English classroom, but educators in other disciplines will find plenty of ideas and information.

Healthcare Transformation using Artificial Intelligence Robert JT Morris, 2025-07-25 Healthcare Transformation Using Artificial Intelligence provides insights into executing healthcare transformation through AI and deploying health technology at scale. It focuses on improving patient outcomes while managing costs, highlighting selected use of AI and contrasting it with a tech push approach. Through interactions with leading clinicians and healthcare administrators, this book presents the most urgent challenges facing patients such as lifestyle, self-empowerment, adherence, knowledge, and behavior change, and clinicians including information overload, time scarcity, rapidly changing guidelines, care quality, and administrative burdens. The book explains recent AI breakthroughs and critically evaluates their promise, showing how AI can be successfully deployed to address these challenges. Real deployments, scaling, and evidence gathering illustrate the best bets for AI in healthcare. Innovation is moving fast, but patient safety, clinical trials, and regulatory approvals ensure appropriate adoption. This resource is valuable for health professionals, scientists, researchers, practitioners, and students wishing to expand their knowledge in this field. Chronicles the healthcare system's problems along with the most promising transformational AI techniques that can be used. Describes data science and AI technologies and why or when they work, including examples and references. Gives simple and understandable descriptions in each application area of how the technologies actually work. Includes examples and case studies of applying AI to achieve better patient outcomes while lowering costs.
