An Attempt at a Categorisation for Quotations on Social Network Sites Julian Botzenhardt, 2015-05-22 Seminar paper from the year 2014 in the subject English Language and Literature Studies Linguistics grade 1.0 University of Augsburg language English abstract According to Boyd and Ellison 2007: 2 Social network sites are web-based services that allow individuals to 1 construct a public or semi-public profile within a bounded system 2 articulate a list of other users with whom they share a connection and 3 view and traverse their list of connections and those made by others within the system People use such services to represent their personality online thus facilitating communication with friends and also the maintenance of social ties Clearly the most successful and influential of those networks is Facebook Established in 2004 as an exclusive community for Harvard students it opened for the general public in 2006 and has since then gathered over 1 billion members all across the globe currently holding second place of the most visited websites worldwide Human communication has always been characterised by the recycling of language When people talk a great extent of the content of their discussion is devoted to what other people have already said In doing so speakers refer to utterances made by themselves or others inter alia by repetition and paraphrasing They do so

simply to report other people's words but also to evaluate what has been said. Quoting has also found its way to communication media online due to the technical properties of computer supported environments facilitating the act of accurately reproducing a previously made statement. Characteristically Facebook employs mechanisms of automated text creation and distribution to support the users in making quotations. These mechanisms though can be very complex and impenetrable. This is why I strive to provide insight into the process of quoting on Facebook in this paper. To do so I will provide insight into the basics of the scientific field of computer mediated communication as well as the structural principle of hypertexts in online environments. Following that I am going to employ a newly shaped definition of the act of quoting by Bublitz in an examination of the most common text actions on the social network site Facebook. Thereby I plan to come up with a framework of quotations on Facebook in both user created and software created texts.

The Routledge Handbook of Philosophy and Media Ethics Carl Fox, Joe Saunders, 2023-11-13 The media informs, entertains and connects us. It is woven into the fabric of politics. Its increasing immediacy has become an inescapable feature of almost everybody's life. We are at the same time subject to the media and participants in it. The ethical questions it raises have never been more urgent. Trust is in short supply but we need to share information while dealing with problems like misinformation, disinformation and echo chambers. And what responsibilities fall on the state and on other actors such as artists, advertisers and social media users as we reckon with endemic problems like racism, sexism and classism. The Routledge Handbook of Philosophy and Media Ethics is an outstanding survey and assessment of this vitally important field. Comprising thirty chapters written by an international team of contributors, the Handbook is divided into five parts: Freedom of Speech, Privacy and Censorship; The News Media; Broadening the Scope; Giving Other Aspects of the Media their Due; Justice, Power and Representation; Vice and Virtue Online. The Routledge Handbook of Philosophy and Media Ethics is essential reading for students and researchers in philosophy, media and communication studies, politics and law as well as practising media professionals and journalists.

polarizing hate speech The company many said had simply lost its way But the truth is far more complex Facebook's engineers were instructed to create tools that encouraged people to spend as much time on the platform as possible even if that meant promoting inflammatory rhetoric conspiracy theories and partisan filter bubbles And while consumers and lawmakers were outraged by privacy breaches and misinformation Facebook solidified its role as the world's most voracious data mining machine posting record profits and shoring up its dominance via aggressive lobbying efforts Drawing on their unrivaled sources Frenkel and Kang take readers inside the alliances and rivalries within the company to demonstrate that the company's missteps were no such thing this is how Mark Zuckerberg and Sheryl Sandberg built Facebook to perform In *An Ugly Truth* they are at last held accountable A Book of the Year Fortune Foreign Affairs The Times London Cosmopolitan TechCrunch WIRED
