Controlling the Message Victoria A. Farrar-Myers, Justin S. Vaughn, 2015-03-27 Choice Outstanding Academic Title of 2016 From the presidential race to the battle for the office of New York City mayor, American political candidates' approach to new media strategy is increasingly what makes or breaks their campaign. Targeted outreach on Facebook and Twitter, placement of a well-timed viral ad, and the ability to roll with the memes, flame wars, and downvotes that might spring from ordinary citizens' engagement with the issues: these skills are heralded as crucial for anyone hoping to get their views heard in a chaotic election cycle. But just how effective are the kinds of media strategies that American politicians employ? And what effect, if any, do citizen-created political media have on the tide of public opinion? In *Controlling the Message*, Farrar-Myers and Vaughn curate a series of case studies that use real-time original research from the 2012 election season to explore how politicians and ordinary citizens use and consume new media during political campaigns. Broken down into sections that examine new media strategy from the highest echelons of campaign management all the way down to passive citizen engagement with campaign issues in places like online comment forums, the book ultimately reveals that political messaging in today's diverse new media landscape is a fragile, unpredictable

and sometimes futile process The result is a collection that both interprets important historical data from a watershed campaign season and also explains myriad approaches to political campaign media scholarship an ideal volume for students scholars and political analysts alike Cross-Cultural Design P.L.Patrick Rau,2014-06-02 This volume constitutes the refereed proceedings of the 6th International Conference on Cross Cultural Design CCD 2014 held as part of the 16th International Conference on Human Computer Interaction HCI International 2014 held in Heraklion Crete Greece jointly with 13 other thematically similar conferences The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from numerous submissions The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems They thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The 76 papers included in this volume deal with the following topics cross cultural product and service design cross cultural issues in interaction social aspects and implications of cross cultural design cross cultural issues in e commerce marketing and branding cross cultural design for knowledge sharing and learning cross cultural design for the smart city and cross cultural design for creativity **Cosmos Unveiled** Barrett Williams,ChatGPT,2025-03-23 Cosmos Unveiled Journey into the Quantum Realm Unlock the mysteries of the universe with Cosmos Unveiled a captivating exploration into the quantum world that surrounds us This eBook offers an illuminating guide through the complexities and wonders of quantum mechanics and particle physics perfect for anyone eager to delve into the building blocks of reality Begin your journey with the fundamental particles and interactions that shape our existence and explore the revolutionary world of quantum mechanics from the birth of quantum theory to the puzzling dual nature of wave and particle Cosmos Unveiled makes these challenging concepts accessible bringing you face to face with quantum entanglement and its mind boggling implications Dive deeper into the heart of the universe with an examination of the Standard Model revealing its strengths and the tantalizing mysteries that lie beyond Delve into the enigmatic realms of dark matter and dark energy as well as groundbreaking theories like supersymmetry to uncover what the future may hold for particle physics Follow the action from particle accelerators to cosmic observatories where the universe s secrets are examined and revealed Explore how quantum physics extends its influence into cosmology and determines the structure and fate of the cosmos itself Consider cutting edge quantum technologies including quantum computing and encryption as they pave the way for a technological revolution Cosmos Unveiled also bridges the gap between quantum theory and general relativity exploring the quest for a unified theory and the potential breakthroughs in quantum gravity Engage with popular culture s take on quantum concepts witnessing how these ideas inspire and sometimes bewilder the creative world For the curious reader this book is more than just an introduction it s a gateway to ongoing discovery Arm yourself with a glossary of key terms and dive into a wealth of additional resources provided to nourish your scientific curiosity Embark on this cosmic journey and uncover

Nature and Nation Jeyamalar Kathirithamby-Wells,2005-10-31 Nature and Nation

explores the relations between people and forests in Peninsular Malaysia where the planet's richest terrestrial eco system met head on with the fastest pace of economic transformation experienced in the tropical world. It engages the interplay of history, culture, science, economics and politics to provide a holistic interpretation of the continuing relevance of forests to state and society in the moist tropics. Malaysia has long been singled out for emulation by developing nations, an accolade contradicted in recent years by concerns over its capital rather than poverty driven forest depletion. The Malaysian case supports the call for re appraisal of entrenched prescriptions for development that go beyond material needs. Book cover

Abrupt Climate Change, 2008 **Boot, Hooves and Wheels** Saikat K Bose, 2015-06-01. The book's title has an apparent misnomer: boots were not used in early armies at least as apparent from temple sculptures which depict bare bodied and barefooted soldiers. But is it likely to have been true? Or social reasons led to suppression of footgear on temple walls? The book explores these and myriad other questions on the military experience of South Asia, hoping to construct a picture of how men, animals and equipment were used on South Asian battlefields from the end of the Paleolithic till the dawn of our era. Further, as all that happens on battlefields is no more than the tip of the proverbial iceberg whose submarine mass conceals many cause effect relationships in a wide variety of fields, the author adopting a wide fronted approach examines the evidence of anthropology, literature, mythology, folklore, technology, archaeology and architecture to reconstruct the military atmosphere of South Asia beyond the battlefield, which is the aim of this book.
