Falls in Older Adults: Prevention and Risk Evaluation Tzvi Dwolatzky, 2023-10-16 Falls are a major health challenge and represent the leading cause of accidental death in older adults. It is essential to identify those factors associated with an increased risk for falls and to develop specific programs for fall prevention. The risk of falling can be assessed in older adults using different parameters including biological, psychosocial, socioeconomic, behavioral, and environmental factors. For example, the risk of falls increases when vision is impaired, when sleep quality is poor, or when mood is depressed. Moreover, physical parameters such as changes in body mass and blood pressure are risk factors for falls in older adults. **Home Workout** DK, 2009-12-21 Forget gyms, expensive kit, and hours of punishing fitness regimes. Choose from a range of 15 minute pilates, yoga, and abs workouts, back exercises, and strength training programmes, and get your body in top shape with Home Workout Clear. At a glance, photos show you exactly what to do, and the live action 60 minute DVD demonstrates a choice of workouts to suit your fitness needs and mood. A total fitness package exercising at home has never been easier or quicker.

Physical Medicine and Rehabilitation Oral Board Review R. Samuel Mayer, 2017-09-28 Physical Medicine and Rehabilitation Oral Board Review is the first publication devoted to preparing for the ABPMR Part II certification examination. This interactive workbook contains 68 cases drawn from all major topic areas identified on the oral exam outline. The vignettes set up common psychiatric problems and are structured to walk you through the types of questions you will encounter and frame meaningful responses to real life scenarios. Cases are formatted to simulate a discussion between an examiner and examinee, presenting a focused approach that directs the candidate to the most appropriate answers. Each case contains questions covering the five clinical skills measured on the oral boards: data acquisition, problem solving, patient management, systems based practice, and interpersonal communication skills and professionalism. Using a question and response format that actively engages readers, the book is designed to foster a systematic approach to clinical questions that can be applied to any case so you can think on your feet, understand the goal of the prompts, and respond effectively, whether in an exam situation or at the bedside. **Key Features:** Structured to help build skills and confidence necessary for success on the PM.
