Artificial Vision and Language Processing for Robotics Álvaro Morena Alberola, Gonzalo Molina Gallego, Unai Garay Maestre, 2019-04-30

Create end to end systems that can power robots with artificial vision and deep learning techniques

Key Features

- Study ROS the main development framework for robotics in detail
- Learn all about convolutional neural networks recurrent neural networks and robotics
- Create a chatbot to interact with the robot

Book Description

Artificial Vision and Language Processing for Robotics begins by discussing the theory behind robots You ll compare different methods used to work with robots and explore computer vision its algorithms and limits You ll then learn how to control the robot with natural language processing commands You ll study Word2Vec and GloVe embedding techniques non numeric data recurrent neural network RNNs and their advanced models You ll create a simple Word2Vec model with Keras as well as build a convolutional neural network CNN and improve it with data augmentation and transfer learning You ll study the ROS and build a conversational agent to manage your robot You ll also integrate your agent with the ROS and convert an image to text and text to speech You ll learn to build an object recognition system using a video By the end of this book you ll have the skills you need to build a functional application that can integrate with a ROS to extract useful information about your environment

What you will learn

- Explore the ROS and build a basic robotic system
- Understand the architecture of neural networks
- Identify conversation intents with NLP techniques
- Learn and use the embedding with Word2Vec and GloVe
- Build a basic CNN and improve it using generative models
- Use deep learning to implement artificial intelligence AI and object recognition
- Develop a simple object recognition system using CNNs
- Integrate AI with ROS to enable your robot to recognize objects

Who this book is for

Artificial Vision and Language Processing for Robotics is for robotics engineers who want to learn how to integrate computer vision and deep learning techniques to create complete robotic systems It will prove beneficial to you if you have working knowledge of Python and a background in deep learning Knowledge of the ROS is a plus
