Do Less Kate Northrup, 2019-04-02 A practical and spiritual guide for working moms to learn how to have more by doing less This is a book for working women and mothers who are ready to release the culturally inherited belief that their worth is equal to their productivity and instead create a personal and professional life that s based on presence meaning and joy As opposed to focusing on fitting it all in time management and leaning in as so many books geared at ambitious women do this book embraces the notion that through doing less women can have and be more The addiction to busyness and the obsession with always trying to do more leads women especially working mothers to feel like they re always failing their families their careers their spouses and themselves This book will give women the permission and tools to change the way they approach their lives and allow them to embrace living in tune with the cyclical nature of the feminine cutting out the extraneous busyness from their lives so they have more satisfaction and joy and letting themselves be more often instead of doing all the time *Do Less* offers the reader a series of 14 experiments to try to see what would happen if she did less in one specific way So rather than approaching doing less as an entire life overhaul which is overwhelming in and of itself this book gives the reader bite sized steps to try incorporating over 2 weeks *English Mechanic and World of Science* ,1873 **English**

Mechanic and Mirror of Science ,1873 *Learning: The Science Inside* Neir Eshel, 2007 **Nineteenth Century Science Fiction** David Seed, 2023-07-18 This volume presents a selection from the American and British fiction of the nineteenth century which was evolving into what we now know as science fiction Taking *Frankenstein* as its formative work it assembles stories and excerpts from narratives exploring the complex impact of new technologies like the telegraph and later the cinema or new scientific practices like mesmerism hypnotism and microscopy The selected authors range from those famous within the realist tradition like George Eliot and Mark Twain to scientists like the physician Silas Weir Mitchell and the inventor Thomas Edison They repeatedly destabilize their narratives so that some come to resemble scientific records and frequently leave their endings unresolved encouraging the reader to speculate about their subjects which include

extensions to the senses new inventions and challenges to individual autonomy Many focus on experiments but might combine scientific enquiry with the supernatural producing hybrid narratives as a result which are difficult to classify
