conservation Migrant Work by Another Name Leah Faith Vosko, 2025-06-26 *Migrant Work by Another Name* explores the complexities of Canada's evolving international migration and employment policy landscape. It critically examines the shift towards mobility programs under the recently inaugurated International Mobility Program (IMP). This shift occurs alongside the contraction of certain streams within Canada's long-standing Temporary Foreign Worker Program (TFWP). The book investigates the implications of policy changes influenced at once by public outcry over migrant worker exploitation and persistent demands for labour in the face of qualitative labour shortages in high-income countries like Canada. Grounded in a decolonial feminist political economy approach, Leah F. Vosko employs a mixed methods analysis to contrast the narrative of mobility with the persistent realities of precarity among transnational workers. The book features in-depth case studies of the three largest IMP subprograms: Working Holiday, Post Graduation, and Spousal Work Permit programs, revealing how these initiatives, despite being touted as promoting mobility, provide for temporary migrant work by another name and perpetuate distinct forms of precarity. This critical perspective challenges the notion of progress in contemporary migration policies, shedding light on the ongoing challenges faced by transnational workers in Canada. *Navigating the FRAM* Riccardo Patriarca, 2025-10-15 In the world of safety science, where complex socio-technical systems demand innovative approaches, the Functional Resonance Analysis Method (FRAM) stands as a beacon of insight. Rooted in modern systemic management and Resilience Engineering principles, the FRAM offers a unique perspective, viewing systems through the lens of everyday performance variability. Developed over decades of meticulous research, the FRAM serves as a powerful tool for modelling intricate systems encompassing various realms: aviation, healthcare, IT software requirements, crisis management, and more. This book represents a culmination of two decades of research and practical applications of the FRAM. It offers an operational perspective and a useful reference for researchers and practitioners alike, empowering them to tackle a myriad of socio-technical modelling challenges. It blends traditional applications with cutting-edge advancements and looks at case studies in which the FRAM was utilized. Delving into the intricacies of the FRAM's structure and functionality, the book equips readers with operational knowledge essential for navigating diverse domains. Written for researchers and practitioners in Occupational Health and Safety, Risk Engineering, Safety Engineering, Resilience Engineering, Human Factors, and related fields, *Navigating the FRAM: Mastering the Functional Resonance Analysis Method for Modelling Complex Socio-Technical Systems* resonates with those seeking to deepen their understanding of complex systems. **\$1200 Shoe's**, 2025-04-02 The wealthy and prestigious small city of Richman, Florida, is where Hazell Bella Brown narrates the brutal, unexpected trials and tribulations that define her life.
