other occupations such as the occupations of a medical doctor or attorney The pathway that a prospective professional athlete can follow to become a professional athlete is fraught with challenges that are not a cinch to surmount Athletic skills are highly desirable skills to possess if a person is adamant about becoming a professional athlete Professional athletes are expected to have the requisite athletic competencies to be able to rank high in professional sports tournaments It can be cumbersome for a person to prevail in professional sports tournaments such as a professional tennis tournament a professional pickleball tournament or a professional table tennis tournament Certain people are enticed to become professional athletes This is partially because as of August of 2025 there are no mandatory requirements that need to be fulfilled for a person to become a professional athlete A person can become a professional athlete without fulfilling any degree requirements nor certification requirements As of August of 2025 fans of professional sports are eager to have more people become professional athletes so that it can augment the competitiveness of professional sports Fans of professional sports prefer for professional sports matches to be played by highly competent professional athletes Professional athletes are often expected to be adept performers in professional sports throughout the totality of their professional athlete careers It can become more arduous for old professional athletes to prevail in professional sports tournaments as more people who are eminently adept at playing professional sports at the meta game level become professional athletes Young adult professional athletes typically have more stamina muscle mass and physical resilience than old athletes A person has the latent potential to become a professional athlete A person can become a professional athlete by implementing the requisite measures to do so A person can become a professional athlete by meticulously learning how to play a professional sport at the meta game level and by profusely training to play a professional sport at the meta game level A person can render himself at a high probability to become highly adept at playing a professional sport at the meta game level by training to play a professional sport at the meta game level for a duration of four to six hours per day Prospective professional athletes are expected to not only meticulously know how to play a professional sport at the meta game level but are also expected to expend an exorbitant amount of hours per week training to play a professional sport at the meta game level for the prospect becoming more adroit at playing a professional sport at the meta game level In elite adult sportspersons training volume can reach 5 to 8 hours per day In the last decade training volumes have increased to 25 30 hours per week at their highest eventually reaching elite status at around 4000 hours per year C t Baker Abernethy 2007 A person can render himself at a higher probability to become a professional athlete if he is homeschooled By homeschooling their children children are at a higher probability to reach their height potential since it furnishes them with tens of thousands of additional hours to get quality deep sleep Children should aim to obtain quality deep sleep for 16 24 hours everyday It is less cumbersome for a person to become a professional athlete if he has a tall height than if he has a short height It stands to preponderantly reason that children should be homeschooled 100% of the time since doing so can cause them to circumvent succumbing to early life slavery
