Resources in Education ,2000 *Student Financing of Higher Education* Donald Heller,Claire Callender,2013-06-07 The financing of higher education is undergoing great change in many countries around the world In recent years many countries are moving from a system where the costs of funding higher education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of the costs There are a number of factors driving these trends including A push for massification of higher education in the recognition that additional revenue streams are required above and beyond those funds available from governments in order to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues Political factors which manifest in demands for funding of over services thus restricting the funding available for higher tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how these trends occur in various countries and regions around the world and the impact they have on higher education institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book gives a truly global picture of the rapidly changing situation Kiplinger's Personal Finance ,2006-02 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics **The Student Loan Mess** Joel Best,Eric Best,2014-05-02 This illuminating investigation uncovers the full dimensions of the student loan disaster A father and son team one a best selling sociologist the other a former banker and current quantitative researcher probes how we ve reached the point at which student loan debt now exceeding 1 trillion and predicted to reach 2 trillion by 2020 threatens to become the sequel to the mortgage meltdown In spite of their good intentions Americans have allowed concerns about deadbeat students crushing debt exploitative for profit colleges and changing attitudes about the purpose of college education to blind them to a growing crisis With college costs climbing faster than the cost of living how can access to higher education remain a central part of the American dream With more than half of college students carrying an average debt of 27 000 at graduation what are the prospects for young adults in the current economy Examining how we ve arrived at and how we might extricate ourselves from this grave social problem The Student Loan Mess is a must read for everyone concerned about the future of American education Hard facts about the student loan crisis Student loan debt is rising by more than 100 billion every year Among recent college students who are supposed to be repaying their loans more than a third are delinquent Because student loans cannot be discharged through bankruptcy the federal government misleadingly treats student loan debt as a government asset Higher default rates spiraling college costs and proposals for more generous terms for student borrowers make it increasingly likely that student loan policies will eventually cost taxpayers hundreds of billions of dollars *International Information and Cultural Series* United States.
