Before you say I'm too busy to get involved with these new tools, consider that the practical guidelines proposed in this book will take you on average only 1-2 hours per week. The Gold Standard Ari Gold, 2024-09-24 In Ari Gold's humble opinion, this is the only book you need to run a successful business. And Ari Gold's humble opinion is never wrong. After years of dominating Hollywood's power players and doling out advice to client Vincent Chase and his entourage, fictional super agent Ari Gold finally offers his invaluable wisdom to everyone in this guide to being as successful in work and in life as Ari Gold himself. Known for his ruthless approach to deal making and client relationships, Gold illuminates for the first time his unique, effective, and some would say outrageous philosophies on running a successful business: client management, employee motivation, keeping a happy home life, and more. Brash, emphatic, and instructive, Gold's book is a refreshing combination of hilarious, satirical, and wise that will entertain fans of *Entourage* or anyone who wants to know the tricks of the trade.

Good Housekeeping, 2009 *Learners Without Borders* Yong Zhao, 2021-06-30 The future of education centers empowered students in a global learning ecosystem. Despite decades of reform, the traditional borders of education—graduation, curriculum, classrooms, schools—have failed to deliver on the goals of excellence and equity. Despite massive societal changes, education remains controlled by an old mindset. It is time to change that limiting mindset and, more importantly, the ineffective practices in education. To truly serve all learners, future classrooms must remove the boundaries of learning and become student-centered, culturally responsive, and personalized, supportive, and equitable environments where each student can direct their own learning and seek multiple pathways to skills and knowledge in a global learning ecosystem. This compelling call for transformative change offers all involved in education evidence-based arguments that reveal the need to break the traditional borders that limit learning. Strategies to personalize learning and remove the confinement of traditional pathways. Examples from around the world to create equitable and student-centric learning environments. Resources for creating a school learning environment that expands opportunities for personalized learning into the global learning ecosystem. It is time to now imagine a different kind of learning without borders and to begin the shifts in practice that will result in personalized learning for all students.
