Using Information and Communication Technologies (ICT) for Mental Health Prevention and Treatment Ana Fonseca, Jorge Osma, 2021-03-30 The use of Information and Communication Technologies ICT to deliver psychological services has been emerging as an effective way of increasing individual access to mental health promotion prevention and treatment This Special Issue brings together different contributions focusing on the acceptability and feasibility cost effectiveness potentialities and limitations of ICT based psychological services for mental health promotion prevention and treatment In each paper the implications for the implementation of ICT tools in different settings e g primary care services and for future research are discussed Psychologists' Desk Reference Gerald P. Koocher, John C. Norcross, Beverly A. Greene, 2013-09-19 This resource for mental health practitioners presents a variety of information required in daily practice in one easy to use resource Covering the entire spectrum of practice issues from diagnostic codes practice guidelines treatment principles and report checklists to insight and advice from today's most respected clinicians this reference gives access to the whole range of current knowledge *Human Health Engineering* Jean-Marie Aerts, 2020-03-12 In this Special Issue on human health engineering we invited submissions exploring recent contributions to the field of human health engineering which is the technology used for monitoring the physical or mental health status of individuals in a variety of applications Contributions focused on sensors wearable hardware algorithms or integrated monitoring systems We organized the different papers according to their contributions to the main aspects of the monitoring and control engineering scheme applied to human health applications including papers focusing on measuring sensing physiological variables contributions describing research on the modelling of biological signals papers highlighting health monitoring applications and finally examples of control applications for human health In comparison to biomedical engineering the field of human health engineering also covers applications on healthy humans e g sports sleep and stress and thus not only contributes to develop technology for curing patients or supporting chronically ill people but also more generally for disease prevention and optimizing human well being Entertainment Computing - ICEC 2018 Esteban Clua, Licinio Roque, Artur Lugmayr, Pauliina Tuomi, 2018-09-05 This book constitutes the refereed proceedings of the 17th International Conference on Entertainment Computing ICEC 2018 held at the 24th IFIP World Computer Congress WCC 2018 in Poznan Poland in September 2018 The 15 full papers 13 short papers and 23 poster demonstration and workshop papers presented were carefully reviewed and selected from 65 submissions They cover a large range of topics in the following thematic areas digital games and interactive entertainment design human computer interaction and analysis of entertainment systems interactive art performance and cultural computing entertainment devices platforms and systems theoretical foundations and ethical issues entertainment for purpose and persuasion computational methodologies for entertainment and media studies communication business and information systems Fashion Management Rosemary Varley, Ana Roncha, Natascha Radclyffe-Thomas, Liz Gee, 2018-10-30

This new textbook authored by a team of expert researchers and lecturers based at the London College of Fashion is one of the first in the field to examine strategic management in the context of the fashion industry catering specifically for students hoping to work in the sector. International in approach, the text covers all aspects of strategic management from growth strategy and financial management to brand and supply chain management. Fashion Management's engaging style, page design and pedagogical framework makes it accessible to students at all levels, while the authors' extensive expertise ensures that the content is always underpinned by rigorous academic research. Established key topics and significant contemporary issues such as sustainability, the digital and corporate social responsibility are considered from both a theoretical and practical perspective with real world examples drawn from high profile global fashion organisations. This is an ideal core textbook for those studying on undergraduate and postgraduate degree courses in fashion management and fashion marketing. The book will also be an important supplementary resource for courses in marketing, retailing and business studies with the fashion industry providing an effective context for students to engage with the application of theory.
