Multinational Enterprises and the Law Peter T. Muchlinski, 2010 Multinational Enterprises and the Law Peter Muchlinski, 2007

Multinational Enterprises and the Law presents the only comprehensive contemporary and interdisciplinary account of the various techniques used to regulate multinational enterprises MNEs at the national regional and multilateral levels In addition it considers the effects of corporate self regulation upon the development of the legal order in this area Split into four parts the book firstly deals with the conceptual basis for MNE regulation explaining the growth of MNEs their business and legal forms the relationship between them and the effects of a globalising economy and society upon the evolution of regulatory agendas in the field Part II covers the main areas of economic regulation including the limits of national and regional jurisdiction over MNE activities controls and liberalization of entry and establishment tax and company and competition law Part III introduces the social dimension of MNE regulation covering labour rights human rights and environmental issues and Part IV deals with the contribution of international law and organizations to MNE regulation and to the control of investment risks covering the main provisions found in international investment agreements and their recent interpretation by international tribunals Legal treatment standards for international investments. Heuristic aspects Cristina-Elena Popa Tache, 2021-06-18

Discussing the standards of legal treatment for international investment means subjecting the law branch in its entirety to research Representing the most comprehensive part of particular importance for international investment law treatment standards continue to generate a series of differentiations whose understanding and approach often require the analysis of the starting points that led to the emergence by division of this branch of law International investment treatment standards represent or should represent the direct effect of the principles of international investment law thus being their expression with a pronounced logical affinity between them Specifically they are not confused with the principles but they are the practical reflection at the level of rights and obligations applicable to the performers in this field in the highlight of the theoretical practical aspect having a customary origin as well as the principles underlying their development Following this logic and analyzing the situation of the latest investment treaties it turns out that there is an insufficiency in the preponderance of treatment standards compared to the principles much more numerous and constantly expanding of this field of law The specificity of this branch of law consists in the emphasis on its fundamental concepts essentializing what determines the whole being considered as a science of essentialization and ultimately the role of any method of scientific research is to analyze discover and highlight what this branch of law represents as a whole what determines it the connections of this ensemble with other sciences the composition and structuring of the system and the substantiation of the connections between its components The standards of legal treatment of international investments settled with the individualization of international investment law Their appearance took place gradually depending on the path marked by the stages of emergence and evolution of the legal regime of foreign investment from the legal phenomenon

to the branch of law from trade in general to foreign investment in particular In all of this legal scientific research plays a key role because any codification activity must be scientifically substantiated Any codification policy must ensure a balance between the diachrony and the synchrony of international investment law between the dynamics and the statics of this law A complete analysis of the treatment standards of international investments can be performed only by a close correlation because the singular existence of a standard specific to this field is excluded from the start The importance of establishing and existence of eloquent and integrated treatment standards is a condition for survival under international economic crises The main feature of this monograph is to present the subject in a way that is as easy to understand as possible to study and apply such rules being a very useful and valuable material for students masters doctoral students theoreticians and practitioners

International Legal Materials, 2007-05 *Law in the Pursuit of Development* Amanda Perry Kessaris, 2009-12-16 *Law in the Pursuit of Development* critically explores the relationships between contemporary principles and practice in law and development Including papers by internationally renowned as well as emerging scholars and practitioners the book is organized around the three liberal principles which underlie current efforts to direct law towards the pursuit of development First that the private sector has an important role to play in promoting the public interest second that widespread participation and accountability are essential to any large scale enterprise and third that the rule of law is a fundamental building block of development This insightful and provocative collection in which contributors critique both the principles and efforts to implement them in practice will be of considerable interest to students academics and practitioners with an interest in the fields of law and development international economic law and law and globalization

Corporate Liability for Transboundary Environmental Harm Peter Gailhofer, David Krebs, Alexander Proelss, Kirsten Schmalenbach, Roda Verheyen, 2022-11-14 This open access book aims to elaborate on the legal prerequisites to establish the liability of corporations for transboundary environmental harm not only by identifying existing liability rules principles and standards but also by analysing their potential for further legal development The authors consider international and transboundary liability law to currently be an underutilised tool for international environmental protection The book seeks to address this by exploring what is needed in terms of legislative action and

identifying options for judicial liability thereby providing an important legal contribution in furthering the development of an effective international and transnational environmental liability law regime **The EU in the Global Investment**

Regime Johann Robert Basedow, 2017-11-07 The European Union EU has emerged as a key actor in the global investment regime since the 1980s At the same time international investment policy and agreements which govern international investment liberalisation treatment and protection through investor to state dispute settlement have become increasingly contentious in the European public debate This book provides an accessible introduction to international investment policy and seeks to explain how the EU became an actor in the global investment regime It offers a detailed analysis of the EU's participation in all major trade and investment negotiations since the 1980s and EU internal competence debates to identify the causes behind the EU's growing role in this policy domain Building on principal agent and historical institutionalist models of incremental institutional change the book shows that Commission entrepreneurship was instrumental in the emergence of the EU as a key actor in the global investment regime It refutes business centred liberal intergovernmental explanations which suggest that business lobbying made the Member States accept the EU's growing role and competence in this domain The book lends support to supranational and challenges intergovernmental thinking on European Integration This text will be of key interest to scholars students and practitioners of European and regional integration EU foreign relations EU trade and international investment law business lobbying and more broadly of international political economy
