Charles Avison's Essay on Musical Expression Pierre Dubois, 2017-07-05 Charles Avison's *Essay on Musical Expression* first published in 1752 is a major contribution to the debate on musical aesthetics which developed in the course of the 18th century Considered by Charles Burney as the first essay devoted to musical criticism proper it established the primary importance of expression and reconsidered the relative importance of harmony and melody Immediately after its publication it was followed by William Hayes's *Remarks* 1753 to which Avison himself retorted in his *Reply* Taken together these three texts offer a fascinating insight into the debate that raged in the 18th century between the promoters of the so called ancient music such as Hayes and the more modern musicians Beyond matters of taste what was at stake in Avison's theoretical contribution was the assertion that the individual's response to music ultimately mattered more than the dry rules established by professional musicians Avison also wrote several prefaces to the published editions of his own musical compositions This volume reprints these prefaces and advertisements together with his *Essay* to provide an interesting view of eighteenth century conceptions of composition and performance and a complete survey of Avison's theory of music
