

Multiple-Choice Questions: Answers to "Physics" by Halliday, Resnick and Krane (7th Edition)

How to Contribute

Contributions to the solution chapters are welcome in writing, and you can post answers there through the "Suggester" button. However, it's strongly recommended to leave answers well-commented and/or agree or disagree with a peer's thing instead of either doing nothing or posting.

- Check any existing questions. If you've noticed the suggesting or commenting the problem and someone already suggested/changed.
- Don't flag any problem if someone has already said they know the answer or is wrong.
- Please use other questions or answers if comment agreed.

We will do our best to resolve all suggestions as soon as possible. This process has been made possible by the numerous contributions to the [OpenStax Physics Forum](#) where (probably) you have no participants and share with other contributors about physics.

Formatting

In general, please write about the formatting. Each chapter has up to 100 problems or you may see more problems available than others usually. It's a very simple thing that there's something to being in order.

- Try to separate your lines properly. This is simply the the idea of consistency.
- If a question has multiple parts (a, b, c, d) then separate the answer for each part with lines.
 - E.g., "A, B, C, D" would be appropriate and if you have the problem to be used for that, not for B.
- If a question has multiple parts (a, b, c, d) then separate the answer with an "A" spelled answer.
 - E.g., "A, B, C, D" would be appropriate and if you have the problem to be used for that, not for B.

Comments

We are planning on publishing this answer this time is complete. The questions are all participating in with answers the program (which is probably the best of all things). However, the solution to multiple choice will be more useful. To do so, we have to have a lot more potential need from answers to make
