Husson, Sebastien Le, Jérôme Pagès, 2017-04-25 Full of real world case studies and practical advice Exploratory Multivariate Analysis by Example Using R Second Edition focuses on four fundamental methods of multivariate exploratory data analysis that are most suitable for applications It covers principal component analysis PCA when variables are quantitative

correspondence analysis CA a Applied Correspondence Analysis Sten-Erik Clausen,1998-06 This volume provides readers with a simple non technical introduction to correspondence analysis CA a technique for summarily describing the relationships among categorical variables in large tables It begins with the history and logic of CA The author shows readers the steps to the analysis category profiles and masses are computed the distances between these points calculated and the best fitting space of n dimensions located There are glossaries on appropriate programs from SAS and SPSS for doing CA and the book concludes with a comparison of CA and log linear models **Multiple Correspondence Analysis and Related Methods**

Michael Greenacre,Jorg Blasius,2006-06-23 As a generalization of simple correspondence analysis multiple correspondence analysis MCA is a powerful technique for handling larger more complex datasets including the high dimensional categorical data often encountered in the social sciences marketing health economics and biomedical research

Until now however the literature on the su The Routledge Companion to Bourdieu's 'Distinction' Philippe Coulangeon,Julien Duval,2014-10-30 This edited collection explores the genesis of Bourdieu s classical book Distinction and its international career in contemporary Social Sciences It includes contributions from contemporary sociologists from diverse countries who question the theoretical legacy of this book in various fields and national contexts Invited authors review and exemplify current controversies concerning the theses promoted in Distinction in the sociology of culture lifestyles social classes and stratification with a specific attention dedicated to the emerging forms of cultural capital and the logics of distinction that occur in relation to material consumption or bodily practices They also empirically illustrate the theoretical contribution of Distinction in relation with such notions as field or habitus which fruitfulness is emphasized in relation with some methodological innovations of the book In this respect a special focus is put on the emerging stream of distinction studies and on the opportunities offered by the geometrical data analysis of social spaces **Routledge**

International Handbook of the Sociology of Art and Culture Laurie Hanquinet,Mike Savage,2015-09-16 The Routledge Handbook of the Sociology of Arts and Culture offers a comprehensive overview of sociology of art and culture focusing especially though not exclusively on the visual arts literature music and digital culture Extending and critiquing Bourdieu s influential analysis of cultural capital the distinguished international contributors explore the extent to which cultural omnivorousness has eclipsed highbrow culture the role of age gender and class on cultural practices the character of aesthetic preferences the contemporary significance of screen culture and the restructuring of popular culture The Handbook critiques modes of sociological determinism in which cultural engagement is seen as the simple product of the educated middle classes The contributions explore the critique of Eurocentrism and the global and cosmopolitan dimensions of cultural life The book focuses particularly on bringing cutting edge relational research methodologies both qualitative and quantitative to bear on these debates This handbook not only describes the field but also proposes an agenda for its development which will command major international interest **Empirical Investigations of Social Space** Jörg

Blasius,Frédéric Lebaron,Brigitte Le Roux,Andreas Schmitz,2020-01-07 This book provides an in depth view on Bourdieu s empirical work thereby specially focusing on the construction of the social space and including the concept of the habitus Themes described in the book include amongst others the theory and methodology for the construction of social spaces the relation between various fields and the field of power formal construction and empirical observation of habitus the formation accumulation differentiation of and conversion between different forms of capital relations in geometric data analysis The book also includes contributions regarding particular applications of Bourdieu s methodology to traditional and new areas of research such as the analysis of institutional international and transnational fields It further provides a systematic introduction into the empirical construction of the social space *The Structure of Digital Partner Choice* Andreas Schmitz,2016-11-01 This work approaches the modern phenomenon of online dating examining the ways people make use of its technical and social potential In particular the users mate preferences choices strategies and interactions are analyzed using the innovative method of click stream observations and web questionnaire data For the purpose of these analyses two major theories are used an explicit theory of individual mate choice and the more general relational theory developed by Pierre Bourdieu which helps to highlight the social structures both underlying and resulting from mating online Results show that online dating is not a partner market free from social structure but that the traditional social conditions found offline are also reproduced in this virtual setting In contrast to the picture drawn by media discourse and advertising online dating represents a partner market which fulfills the promise of happiness in a socially differential way *Researching Elites and Power* Francois Denord,Mikael Palme,Bertrand Réau,2020-08-12 This open access book describes how elite studies theoretically and methodologically construct their object i e how particular conceptualizations of elites are turned into research practice using different methods for collecting dealing with and analyzing empirical data The first of four sections focuses on what Mills named the power elite and includes Bourdieu s field of power The second section addresses studies of the domain of economic power whereas the third section centers on research on elite education The fourth and last section highlights research on symbolic power either within social fields or as a dimension of social structure at large areas where recognition is essential All sections comprise empirical case studies of elites and power whereby each of which makes explicit the various methodological choices made in the research process Through focusing on methodological approaches for the study of elites and power and on how such approaches relate to each other as well as to the theoretical perspectives that underpin them this book will be a valuable source for social scientists Functions, Methods and Concepts in Evaluation Research R. Stockmann,W. Meyer,2013-11-27 By explaining the role of evaluation in modern societies and its historical development in the USA and Europe this book highlights the scientific roots of Evaluation and offers an overview of its fundamental theories and concepts The process of collecting analyzing and interpreting is explored giving an insight into the course of an evaluation *Politics and Rhetoric of Italian State Steel Privatisation* Edoardo Mollona,Luca

Pareschi,2022-05-17 The globally spreading privatisation wave that occurred in the 1990s deeply changed the structure of economic institutions worldwide This turmoil overturned not only economic institutions but shared cultural and societal institutions as well This book is the result of an investigation into the history of the privatisation of the steel industry in Italy completed between 1994 and 1995 It explores the history of the Italian steel industry by looking at the interplay of local intertwined interests political relations and ideological formations that characterised an idiosyncratic hegemonic historical bloc Rather than stigmatising this pattern as the legacy of a dysfunctional provincialism the authors mobilise Gramsci's theory of hegemony to explain how the Italian privatisation process unfolded to accommodate economic pressures political interests and ideological constraints of a hegemonic social group or aggregation of social groups Thus in reconstructing the privatisation of Italian steel this book proposes a hegemony theory of privatisation and more generally describes a model that explains how political and cultural dynamics give rise to idiosyncratic local variations in globally spreading policies It will be of interest to researchers academics and students in the fields of business history economics sociology and political science

New Directions in Elite Studies Olav Korsnes,Johan Heilbron,Johs. Hjellbrekke,Felix Bühlmann,Mike Savage,2017-12-06 Since the financial crisis the issue of the one percent has become the centre of intense public debate unavoidable even for members of the elite themselves Moreover inquiring into elites has taken centre stage once again in both journalistic investigations and academic research *New Directions in Elite Studies* attempts to move the social scientific study of elites beyond economic analysis which has greatly improved our knowledge of inequality but is restricted to income and wealth In contrast this book mobilizes a broad scope of research methods to uncover the social composition of the power elite the field of power It reconstructs processes through which people gain access to positions in this particular social space examines the various forms of capital they mobilize in the process economic but also cultural and social capital and probes changes over time and variations across national contexts Bringing together the most advanced research into elites by a European and multidisciplinary group of scholars this book presents an agenda for the future study of elites It will appeal to all those interested in the study of elites inequality class power and gender inequality

What is Driving Women's Financial Inclusion Across Countries? Ms.Corinne C Delechat,Ms.Monique Newiak,Rui Xu,Mr.Fan Yang,Goksu Aslan,2018-03-05 Using a broad set of macroeconomic country characteristics to supplement a new and comprehensive micro level dataset for 140 countries we identify structural factors policies and individual characteristics that are associated with financial inclusion in general and for women in particular We find that structural country characteristics such as resource richness and level of development and policies such as stronger institutions and financial development are significantly related to financial inclusion We find a robust negative relationship between being female and financial inclusion as in previous studies and our analysis points to legal discrimination lack of protection from harassment including at the work place and more diffuse gender norms as possible explanatory factors

Event History and Survival Analysis Paul D. Allison,2014-02-19 Social

scientists are interested in events and their causes Although event histories are ideal for studying the causes of events they typically possess two features censoring and time varying explanatory variables that create major problems for standard statistical procedures Several innovative approaches have been developed to accommodate these two peculiarities of event history data This volume surveys these methods concentrating on the approaches that are most useful to the social sciences In particular Paul D Allison focuses on regression methods in which the occurrence of events is dependent on one or more explanatory variables He gives attention to the statistical models that form the basis of event history analysis and also to practical concerns such as data management cost and useful computer software The Second Edition is part of SAGE's Quantitative Applications in the Social Sciences QASS series which continues to serve countless students instructors and researchers in learning the most cutting edge quantitative techniques

Multilevel Modeling Douglas A. Luke, 2019-12-13 Multilevel Modeling is a concise practical guide to building models for multilevel and longitudinal data Author Douglas A Luke begins by providing a rationale for multilevel models outlines the basic approach to estimating and evaluating a two level model discusses the major extensions to mixed effects models and provides advice for where to go for instruction in more advanced techniques Rich with examples the Second Edition expands coverage of longitudinal methods diagnostic procedures models of counts Poisson power analysis cross classified models and adds a new section added on presenting modeling results A website for the book includes the data and the statistical code both R and Stata used for all of the presented analyses

The Field of Eurocracy D. Georgakakis, J. Rowell, 2013-12-12 The word Eurocracy has resonance throughout Europe but in reality we know little about the people who work in and around the EU or how they fit into its large bureaucratic framework Based on extensive fieldwork this book addresses this problem by exploring the MEPs diplomats civil servants and commissioners that work in and around the EU
