Murder Scenes Sace Elder,2010-07-23 Sace Elder has exhaustively researched both newspaper and other popular and professional treatments of murder cases and archival sources of police investigations and trials in Berlin between 1919 and 1931 Murder Scenes is an innovative and insightful exploration of the ways in which these investigations and trials and the publicity surrounding them reflected and shaped changing notions of normality and deviance in Weimar era Berlin Kenneth Ledford Case Western Reserve University Using police reports witness statements newspaper accounts and professional publications Murder Scenes examines public and private responses to homicidal violence in Berlin during the tumultuous years of the Weimar era Criminology and police science both of which became increasingly professionalized over the period sought to control and contain the blurring of these boundaries but could only do so by relying on a public that was willing to participate in the project These Weimar developments in police practice in Berlin had important implications for what Elder identifies as an emerging culture of mutual surveillance that was successful both because and in spite of the incompleteness

of the system police sought to construct a culture that in many ways anticipated the culture of denunciation in the Nazi period. In addition to historians of Weimar modern Germany and modern Europe, German studies and criminal justice scholars will find this book of interest. Sace Elder is Associate Professor of History at Eastern Illinois University. **Murder and Mountain Justice in the Moonshine Capital of the World** Phillip Andrew Gibbs, 2023. A Story of Hard Spirits and Defiant Souls. Franklin County, Virginia has long been known as the Moonshine Capital of the World. That history can seem romantic, but the county has a dark and violent past. The descendants of the Scots Irish who settled its rugged mountains openly defied the law and employed their own notions of justice to defend their traditions and livelihood. During Prohibition, the production of moonshine skyrocketed, but the liquor didn't stop flowing from the mountains when the Eighteenth Amendment was repealed. County and state officials struggled to maintain order in a region where unsolved murders, strange disappearances, and senseless killings were a way of life. The peak came in 1978 with nine murders linked to moonshine and drugs in the county. Historian and Virginia native Phillip Andrew Gibbs tells the story of that horrific year and the history behind it. **The Murderer Next Door** David M. Buss, 2006-04-25. As acclaimed psychological researcher and author David Buss writes, "People are mesmerized by murder. It commands our attention like no other human phenomenon, and those touched by its ugly tendrils never forget. Though we may like to believe that murderers are pathological misfits and hardened criminals, the vast majority of murders are committed by people who until the day they kill would seem to be perfectly normal." David Buss's pioneering work has made major national news in the past, and this provocative book is sure to generate a storm of attention. **The Murderer Next Door** is a riveting look into the dark underworld of the human psyche, an astonishing exploration of when and why we kill, and what might push any one of us over the edge. A leader in the innovative field of evolutionary psychology, Buss conducted an unprecedented set of studies investigating the underlying motives and circumstances of murders, from the bizarre outlier cases of serial killers to those of the friendly next-door neighbor who one day kills his wife. Reporting on findings that are often startling and counterintuitive, the younger woman involved in a love triangle is at a high risk of being killed, he puts forth a bold new general theory of homicide, arguing that the human psyche has evolved specialized adaptations whose function is to kill. Taking readers through the surprising twists and turns of the evolutionary logic of murder, he explains exactly when each of us is most at risk, both of being murdered and of becoming a murderer. His findings about the high-risk situations alone will be news-making. Featuring gripping storytelling about specific murder cases, including a never-used FBI file of more than 400,000 murders and a highly detailed study of 400 murders conducted by Buss in collaboration with a forensic psychiatrist, and a pioneering investigation of homicidal fantasies in which Buss found that 91 percent of men and 84 percent of women have had at least one such vivid fantasy, **The Murderer Next Door** will be necessary reading for those who have been fascinated by books on profiling, lovers of true crime and murder mysteries, as well as readers intrigued by the inner workings of the human mind. **Murder and the Reasonable Man** Cynthia Lee, 2007-10. A

man murders his wife after she has admitted her infidelity another man kills an openly gay teammate after receiving a massage a third man white goes for a jog in a bad neighborhood carrying a pistol and shoots an African American teenager who had his hands in his pockets When brought before the criminal justice system all three men argue that they should be found not guilty the first two use the defense of provocation while the third argues he used his gun in self defense Drawing upon these and similar cases Cynthia Lee shows how two well established traditional criminal law defenses the doctrines of provocation and self defense enable majority culture defendants to justify their acts of violence While the reasonableness requirement inherent in both defenses is designed to allow community input and provide greater flexibility in legal decision making the requirement also allows majority culture defendants to rely on dominant social norms such as masculinity heterosexuality and race i e racial stereotypes to bolster their claims of reasonableness At the same time Lee examines other cases that demonstrate that the reasonableness requirement tends to exclude the perspectives of minorities such as heterosexual women gays and lesbians and persons of color Murder and the Reasonable Man not only shows how largely invisible social norms and beliefs influence the outcomes of certain criminal cases but goes further suggesting three tentative legal reforms to address problems of bias and undue leniency Ultimately Lee cautions that the true solution lies in a change in social attitudes
