terms of its modes scales and theory its instruments forms and aesthetic goals its historical development golden age and condition today and the conventions governing its performance The writers are leading ethnomusicologists and their approach is based on the belief that music is best understood in the context of the culture which gave rise to it By including Mande and Uzbek Tajik music plus North American jazz in addition to the better known styles of the Middle East the Indian sub continent the Far East and South East Asia this book offers challenging new perspectives on the word classical It shows the extent to which most classical traditions are underpinned by improvisation and reveals the cognate origins of seemingly unrelated musics it reflects the multifarious ways in which colonialism migration and new technology have affected musical development and continue to do today With specialist language kept to a minimum it is designed to help both students and general readers to appreciate musical traditions which may be unfamiliar to them and to encounter the reality which lies behind that lazy adjective exotic
