Music, Sound, and Technology in America Timothy D. Taylor, Mark Katz, Tony Grajeda, 2012-06-19 This reader collects primary documents on the phonograph cinema and radio before WWII to show how Americans slowly came to grips with the idea of recorded and mediated sound Through readings from advertisements newspaper and magazine articles popular fiction correspondence and sheet music one gains an understanding of how early 20th century Americans changed from music makers into consumers Sound Recording Technology and American Literature Jessica E. Teague, 2021-05-20

Phonographs tapes stereo LPs digital remix how did these remarkable technologies impact American writing This book explores how twentieth century writers shaped the ways we listen in our multimedia present Uncovering a rich new archive of materials this book offers a resonant reading of how writers across several genres such as John Dos Passos Langston Hughes William S Burroughs and others navigated the intermedial spaces between texts and recordings Numerous scholars have taken up remix a term co opted from DJs and sound engineers as the defining aesthetic of twenty first century art and literature Others have examined modernism s debt to the phonograph But in the gap between these moments one finds that the reciprocal relationship between the literary arts and sonic technologies continued to evolve over the twentieth century A mix of American literary history sound studies and media archaeology this interdisciplinary study will appeal to scholars students and audiophiles **The Soundscape of Modernity** Emily Thompson, 2004-09-17 A vibrant history of acoustical technology and aural culture in early twentieth century America In this history of aural culture in early twentieth century America Emily Thompson charts dramatic transformations in what people heard and how they listened What they heard was a new kind of sound that was the product of modern technology They listened as newly critical consumers of aural commodities By examining the technologies that produced this sound as well as the culture that enthusiastically consumed it Thompson recovers a lost dimension of the Machine Age and deepens our understanding of the experience of change that characterized the era Reverberation equations sound meters microphones and acoustical tiles were deployed in places as varied as Boston s Symphony Hall New York s office skyscrapers and the soundstages of Hollywood The control provided by these technologies however was applied in ways that denied the particularity of place and the diverse spaces of modern America began to sound alike as a universal new sound predominated Although this sound clear direct efficient and nonreverberant had little to say about the physical spaces in which it was produced it speaks volumes about the culture that created it By listening to it Thompson constructs a compelling new account of the experience of modernity in America *Off the Record* David Morton, 2000 David Morton examines the process of invention innovation and diffusion of communications technology using the history of sound recording as the focus Recording culture in America emerged Morton writes not through the dictates of the technology alone but in complex ways that were contingent upon the actions of users **Music, Sound, and Technology** John Eargle, 1990-08-09 This book is about music the instruments and players who produce it and

the technologies that support it Although much modern music is produced by electronic means its underlying basis is still traditional acoustical sound production and that broad topic provides the basis for this book There are many fine books available that treat musical acoustics largely from the physical point of view The approach taken here is to present only the fundamentals of musical physics while giving special emphasis to the relation between instrument and player and stressing the characteristics of instruments that are of special concern to engineers and technicians involved in the fields of recording sound reinforcement and broadcasting In order to understand musical instruments in their normal performance environments the student must have a basic working knowledge of physical and architectural acoustics The book begins with a review of the elements of acoustics stressing the nature of sound fields and phenomena that are wavelength dependent The book then moves on to a discussion of those aspects of psychological acoustics that are of special concern to music technicians most notably concepts of stereophonic imaging loudness related phenomena and critical band theory **Sound**

Technology and the American Cinema James Lastra, 2000-07-18 Representational technologies including photography phonography and the cinema have helped define modernity itself Since the nineteenth century these technologies have challenged our trust of sensory perception given the ephemeral unprecedented parity with the eternal and created profound temporal and spatial displacements But current approaches to representational and cultural history often neglect to examine these technologies James Lastra seeks to remedy this neglect Lastra argues that we are nowhere better able to track the relations between capital science and cultural practice than in photography phonography and the cinema In particular he maps the development of sound recording from its emergence to its confrontation with and integration into the Hollywood film Reaching back into the late eighteenth century to natural philosophy stenography automata and human physiology Lastra follows the shifting relationships between our senses technology and representation *American Film History* Cynthia Lucia, Roy Grundmann, Art Simon, 2015-06-25 This authoritative collection of introductory and specialized readings explores the rich and innovative history of this period in American cinema Spanning an essential range of subjects from the early 1900s Nickelodeon to the decline of the studio system in the 1960s it combines a broad historical context with careful readings of individual films Charts the rise of film in early twentieth century America from its origins to 1960 exploring mainstream trends and developments along with topics often relegated to the margins of standard film histories Covers diverse issues ranging from silent film and its iconic figures such as Charlie Chaplin to the coming of sound and the rise of film genres studio moguls and later the Production Code and Cold War Blacklist Designed with both students and scholars in mind each section opens with an historical overview and includes chapters that provide close careful readings of individual films clustered around specific topics Accessibly structured by historical period offering valuable cultural social and political contexts Contains careful close analysis of key filmmakers and films from the era including D W Griffith Charles Chaplin Buster Keaton Erich von Stroheim Cecil B DeMille Don Juan The Jazz Singer I Am a Fugitive from a Chain Gang Scarface Red

Dust Glorifying the American Girl Meet Me in St Louis Citizen Kane Bambi Frank Capra's Why We Fight series The Strange Love of Martha Ivers Rebel Without a Cause Force of Evil and selected American avant garde and underground films among many others Additional online resources such as sample syllabi which include suggested readings and filmographies for both general specialized courses will be available online May be used alongside American Film History Selected Readings 1960 to the Present to provide an authoritative study of American cinema through the new millennium

The ^AOxford Handbook of Music and the Middlebrow Kate Guthrie, Christopher Chowrimootoo, 2024-12-03 This handbook seeks to reanimate the music institutions and audiences that made up the cultural middle in the nineteenth and twentieth centuries by investigating the wealth of middlebrow culture that bridged the space between highbrow and lowbrow music With case studies ranging from symphonic concerts to Broadway musicals from opera criticism to rock journalism it brings together scholars of classical and popular music to present a new enriched narrative of music history
