

Use Petro-Canada Premium HVI60 or Mobil DTE 15M hydraulic oil (or ISO VG46 equivalent) that contains anti-rust, anti-foam and anti-oxidation additives. Hydraulic oil filter element should be replaced after every 500 hours of operation or annually (whichever occurs first). For details, refer to "Hydraulic Oil Filter Element Replacement" procedure in the *Hydraulics System* chapter.

NOTE: Refer to the operator's manual for additional information on hydraulic oil filter element change intervals.

Crankcase Oil

The Yanmar four-cylinder diesel engine crankcase has a capacity of 11.0 U.S. quarts (10.4 liters). The chart below lists recommended oil viscosity for the Yanmar engine.

Ambient Temperature	Viscosity
Below 32°F (0°C)	SAE 10 or 10W-30
Above 32°F (0°C)	SAE 15W-40
Service classification: API - CF-4/SL-4	

Engine oil should be changed and filter element replaced every 250 hours of service. Access to the engine oil filter is left of the radiator cooler, and a remote drain plug is located behind the left rear tire.

NOTE: Refer to the operator's manual for additional information on engine oil and filter element change intervals, including the 50-hour initial oil change.
