Erford, 2018-04-17 The overriding theme of *Group Work Processes and Applications* is a focus on the specialized group work that counselors perform from a systemic perspective in a multicultural context This text briefly covers traditional theoretical approaches focusing more on the techniques and applications of the approaches but the core of the text involves the systemic approach to group work preparing group leaders to facilitate the systemic group process from planning the group through the four stages of group work forming and orienting transition working and termination The content is aligned with 2016 CACREP standards Numerous other techniques covered are linked with specific theoretical orientations PowerPoints and Instructor's manual are on the way and should be available in the next 2-3 months *Belonging and Becoming in a*

Thinking Critically through Digital Media Nik Peachey, Although the use of internet and digital materials in the language classroom has come a long way over the last 25 years still the vast majority of web based material that finds its way into the language classroom is used for information input or comprehension purposes The students interaction with the materials is as such largely passive with the teacher controlling the suitability of the materials selected and deciding what information the students will extract from it In *Thinking Critically through Digital Media* I have tried to build on this model but develop it and take it to deeper and more critical levels of analysis that go beyond the superficial linguistic level and help to develop students not only as English language speakers but as capable information literate participants in the global knowledge economy The book uses as its basis the development of key digital literacies These include the ability to understand visually presented data the ability collect and analyse data using a range of techniques and survey tools and the ability to create and deliver a range of presentation types using digital media tools Whilst developing these digital literacies students are also encouraged to assess the validity credibility and underlying bias of the information they study and are given a range of research tools and techniques for reassessing the information and evaluating how it fits within their personal framework of

belief systems and values The book itself has four main chapters The first three chapters contain a range of activities that teachers can use with students to develop their abilities to understand and create infographics develop research polls and surveys and create and deliver presentations These activities give students hands on exposure to a range of recommended tools and develop students as active creators of information whilst developing their abilities to work collaboratively in digital online environments The fourth key chapter of the book is a collection of lesson plans that teachers can use to take students through a complete process from accessing their existing knowledge about a topic understanding new input examining how the information fits into their existing value scheme checking the credibility and validity of the information carrying out their own parallel research through social media to finally sharing and reevaluating what they have learned You can see an example of the classroom materials here https://bit.ly/intro_extro_demo I believe that the skills and abilities teachers can help students develop through the use of these materials are ones that are sadly lacking not only in the English language classroom but also in the general education of many students around the world Through the use of these materials I hope teachers can develop more actively and intellectually critical students who approach digital media with the ability not only to comprehend and consume information but also understand the possible bias motivation and underlying values of those creating the information I believe these skills and abilities are key to creating a more tolerant open minded and critically aware global society

From Africa to the Heart of the GOP David O. Agbeti, 2005 This book is a true account of the events on a long ago night when two angels from heaven visited me It is the story of that angelic encounter as I experienced it It happened many years ago but the impressions are still vivid in my memory It was not a fleeting glimpse of ethereal beings clothed in cloudy mist Those angels were real If seen from a distance they probably would have seemed like ordinary men Close up however no one could have mistaken them for men Anyone would have known they were angels who had come down from heaven During their first appearance it seemed to me their speech to me lasted a long time In retrospect that time period probably could have been measured in minutes That is true even though they seemed like very long minutes They were silent during their brief second appearance albeit puzzled and inquisitive These angels had about them a mysterious air of another world They stood in front of my chair in my living room with an indescribable and lofty majesty Their posture and demeanor spoke of another sphere of existence A sphere about which writers have speculated for thousands of years They somehow reeked of an indescribable physical and mental power that was beyond my comprehension My initial reaction was fright A fright so great it overwhelmed my senses I thought they had come to kill me That was a certainty in my numbed mind That fear quickly became life threatening I did not know it at the time but their actions and speech would be forever impressed on my memory During their first visit they were extremely anxious to reassure me They did not wish me to fear them Their speech was sympathetic and reassuring They told me they had not

come to injure me in any way They then explained the reason for their intrusion into my presence Nothing that I have found anywhere in literature except perhaps the bible tells a similar story My personality underwent a complete change that night The brief account of that experience is now told for the first time in the 40 years since that encounter

in which they live The book extends debates on the inclusion and exclusion of Muslim minorities beyond ideas of marginalisation to show that while there have undoubtedly been increased incidences of Islamophobia since September 2001 some Muslim groups have played their own part in separating themselves from the wider society The cases examined show how these tendencies span geographical ethnic and gender divides and can be encouraged by a combination of international and national developments prompting some groups to identify wider society as the other Muslim and non Muslim scholars and practitioners in political science social work history and law also highlight positive outcomes in terms of Muslim activism with relationship to their respective countries and suggest ways in which increasing tensions felt perceived or assumed can be eased and greater emphasis given to the role Muslims can play in shaping their place in the wider communities where they live
