When the Nerds Go Marching In Rachel K. Gibson, 2020-08-03 Digital technology has moved from the margins to the mainstream of campaign and election organization in contemporary democracies Previously considered a mere novelty item technology has become a basic necessity for any candidate or party contemplating a run for political office While it is difficult to pinpoint exactly when

the first digital campaign was officially launched the general consensus is that the breakthrough moment at least in terms of public awareness came during the 1992 U S election cycle At the presidential level it was Democratic nominee Bill Clinton who laid claim to this virtual terra nova after his staff uploaded a series of basic text files with biographical information for voters to browse Since that time use of the internet in elections has expanded dramatically in the U S and elsewhere When the Nerds Go Marching In examines the increasing role and centrality of the internet within election campaigns across established democracies since the 1990s Combining an extensive review of existing literature and comparative data sources with original survey evidence and web content analysis of digital campaign content across four nations the UK Australia France and the U S the book maps the key shifts in the role and centrality of the internet in election campaigns over a twenty year period Specifically Gibson sets out the case for four phases of development in digital campaigns from early amateur experimentation and standardization to more strategic mobilization of activists and voters In addition to charting the way these developments changed external interactions with citizens Gibson details how this evolution is transforming the internal structure of political campaigns Despite some early signs that the internet would lead to the devolution of power to members and supporters more recent developments have seen the emergence of a new digitally literate cohort of data analysts and software engineers in campaign organizations This group exercises increasing influence over key decision making tasks Given the resource implications of this new data driven mode of digital campaigning the book asserts that smaller political players face an even greater challenge to compete with their bigger rivals Based on her findings Gibson also speculates on the future direction for political campaigns as they increasingly rely on digital tools and artificial intelligence for direction and decision making during elections *Cyber Law, Privacy, and Security: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources, 2019-06-07

Social Media in Asia Azman Azwan Azmawati, Rachel E. Khan, 2016-09-23 As part of the advocacy of the Asian Congress for Media and Communication (ACMC) to promote regional studies in global academic discourse, this book contributes to a better understanding of social media within the context of Southeast Asian countries with the addition of Sri Lanka. The contributors here are primarily Asian academics and practitioners immersed in the fields of media and communication. Throughout the chapters, the reader will discover that social media has changed the paradigm of communication in the region as an avenue for free expression, as a tool for news gathering and news distribution, as an aid in crime prevention and even as a means to find a lifelong partner. For non Asian readers, there is also an annex that provides a summary of social media statistics in the region to allow the countries mentioned in this book to be situated within the global context. Malaysia Human Rights Report 2017 SUARAM, 2018-06-12 Malaysian Human Rights Report 2017 SUARAM's Annual Human Rights Report on Malaysia is widely recognized as the most objective, comprehensive and dependable source of information on the state of human rights in Malaysia. It documents the human rights violations of all the fundamental liberties as well as the struggles of human rights defenders that take place in Malaysia during the year. In 2017, Malaysia struggled with growing repression as the 14th General Election approached. With the competition for political dominance, freedom of expression became the victim and there was widespread arrest, detention and prosecution for online comments made on social media and the silencing of print and online media using frivolous justifications. Freedom of religion was another victim. In the short five years since the abolition of the Internal Security Act 1960, the criminal justice system of Malaysia has re-oriented its policy on tackling crime by the use of detention without trial. With more than 2,000 individuals detained under SOSMA, POCA, POTA and DDA, it is clear that we are seeing the old ISA in a new guise. Beyond the politically motivated human rights violations, corporations and state-linked enterprises were also human rights violators. State agencies which are expected to defend and protect the rights and interests of the community, especially the indigenous peoples, instead acted as defenders of the corporate interests. With no justice or remedy in sight, all that the communities could do was to stand and defend their rights and dignity by setting up blockades against the

production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments
