Levine, 2022-04-22 A college education doesn't come with a sticker price Maybe it should Millions of Americans miss out on the economic benefits of a college education because of concerns around the costs Financial aid systems offer limited help and produce uneven distributions In the United States today the systems meant to improve access to education have added a new layer of deterrence In Mismatch economist Philip B Levine examines the role of financial aid systems in facilitating and discouraging access to college If markets require prices in order to function optimally then the American higher education system rife as it is with hidden and variable costs amounts to a market failure It's a problem of price transparency not just affordability Ensuring that students understand exactly what college will cost including financial aid could lift the lid on not only college attendance for more people but for greater representation across demographics and institutions As Levine illustrates our conversations around affordability and free tuition miss a larger truth that the opacity of our current college financing systems is a primary driver of inequities in education and society Mismatch offers a bold trenchant new argument for an educational reform that is well within reach *Effective Teaching* Shelley B.
