Brady, PhD, MAC, 2022-11-11 Analyzes the influence of technology and social media on human development with parents and families in mind This is a story about a family coming of age at the same time as smartphones and social media a multiracial family coming into its own as windows into social injustice opened up before our very screens and a multi parent multi professional family with children living differently depending on which house and which combination of family members happen to be home While it is a story about a family it is really the story of technological and global changes unfolding on our doorsteps While many revile the ascendance of smartphones and social media and the way they suck us into the vortex of cyberspace there are cultural touchpoints that reflect deeper human and technology development patterns patterns which we would all do well to understand no matter whether or how we choose to engage in the ever innovating digital frontiers Informed by research and interviews with leaders in policy human development ethics and technology Loretta Brady helps readers understand the complex systemic challenges and findings related to technology and human development We do not have to hate or fear technology It is neither friend nor foe But understanding its impact on our daily lives is paramount to cultivating a healthier relationship both with our digital lives and our real lived ones

The Tragedy of True Crime John J. Lennon, 2025-09-23 In 2001 John J Lennon killed a man on a Brooklyn Street Now he is a journalist working from behind bars trying to make sense of it all The Tragedy of True Crime is a first person journalistic account of the lives of four men who have killed written by a man who has killed Lennon entered the New York prison system with a sentence of 28 years to life but after he stepped into a writing workshop at Attica Correctional Facility his whole life changed Reporting from the cell block and the prison yard Lennon challenges our obsession with true crime by telling the full life stories of men now serving time for the lives they took These men have completely different backgrounds Robert Chambers a preppy Manhattanite turned true crime celebrity Milton E Jones a seventeen year old coaxed from burglary into something far darker and Michael Shane Hale a gay man caught in a crime of passion and all are searching to find meaning and redemption behind bars Lennon's reporting is intertwined with his own story from a young man seduced by the infamous gangster culture of New York City to a celebrated prison journalist The same desire echoes throughout the lives of these four men to become more than murderers A first of its kind book of immersive prison journalism The Tragedy of True Crime poses fundamental questions about the stories we tell and who gets to tell them What essential truth do we lose when we don't consider all that comes before an act of unthinkable violence And what happens to the convicted after the cell gate locks

Learning to Drive on the Internet Superhighway Harry Jordon, 2021-08-30 Love and peace driven by cross cultural weddings and music like those of the Beatles and Pink Floyd of the 60s is being forgotten in the Twitter and Facebook era of today Good habits created through wisdom passed down by elders and extended families over breakfast and dinner are being taken over by bad habits being learned on the internet over

those same meals Special occasions like the 2020 Valentine s Day was devoted to such extreme internet posts from White House to university students instead of say addressing coronavirus or climate change that one can only wonder what medicine these people take and what is happening within their households and marriages today The World Wide Web has become like the Wild West of western books An equivalent of the coronavirus is also being spread through the internet Besides affecting our mental health it is also affecting our planet What s remarkable is not how much pollution went down during the pandemic lockdown but how little Other factors impacting climate change besides carbon emissions have been discussed in this book Simulation involving additional households willing to do clinical trial studies on a larger scale will be needed for the next phase Diet air conditioning and the internet may be the most neglected factors as climate change modelers attempt to figure out why events that were supposed to happen eighty years from 2008 are happening today Besides improving health and wealth of individuals organizations and countries the home wellness program provided here can help achieve universal health care coverage for a fraction of what it would cost today It will also help reduce deficits and extend our planet s life by another one hundred years Drawing on Einstein s famous $E=mc^2$ equation the book demonstrates how increase in economic stimulus c^2 is reducing the life m of our planet Scientists and climate change experts are now saying the planet may have only twenty five years remaining before it becomes uninhabitable New cross country models for driving change need This can be done using 3P simplification for currency tracing for medical tourism It needs to prevent another pandemic from happening again It needs to be scalable for an Interstellar movie type solution since our planet is dying
