students not only will be trained on computation to find answers they also are asked to use their thinking skills to figure out the problems by going through visualization orientation corresponding analyzing synthesizing and executing abstract commanding symbols The enforcement for the students to write the problems only imprints more impression on the number facts <https://www.youtube.com/watch?v=D3wAMqo4qUE> What is Intelligent Arithmetic Worksheet The intelligent Arithmetic worksheet allows students to work on computations but figures out the answers like they are working on word problems I have dreamed about how can I create a type of computation worksheets which are disruptively different from the traditionally straightforward type of computational worksheets Not only they have to be fun intriguing and entertaining they also must be effective in learning results This example is one of many examples which I created and collected them in my workbook called Ultimate Math Contest Preparation Problem Solving Strategies and Math IQ Puzzles Grade 1 and 2 from pages 28 to 74 The Intelligent Arithmetic Worksheets take the exploratory approach which trains a student to use more of his or her brain and yet the problem is not difficult so an average student can solve them with fun I also created a video which introduces my math chess and puzzles combined idea as follows <https://www.youtube.com/watch?v=Td3SKp7cukA>
