Samsung Rising Geoffrey Cain,2020-03-17 An explosive expose of Samsung that reads like a dynastic thriller rolling through three generations of family intrigue embezzlement bribery corruption prostitution and other bad behavior The Wall Street Journal LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist The Wall Street Journal and Time from his base in South Korea and his countless sources inside and outside the company Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows Seen for decades in tech circles as a fast follower rather than an innovation leader Samsung today has grown to become a market leader in the United States and around the globe They have captured one quarter of the smartphone market and have been pushing the envelope on every front Forty years ago Samsung was a rickety Korean agricultural conglomerate that produced sugar paper and fertilizer located in a backward country with a third world economy With the rise of the PC revolution though Chairman Lee Byung chul began a bold experiment to make Samsung a major supplier of computer chips The multimillion dollar plan was incredibly risky But Lee wowed by a young Steve Jobs who sat down with the chairman to offer his advice became obsessed with creating a tech empire And in *Samsung Rising* we follow Samsung behind the scenes

as the company fights its way to the top of tech It is one of Apple's chief suppliers of technology critical to the iPhone and its own Galaxy phone outsells the iPhone Today Samsung employs over 300 000 people compared to Apple's 80 000 and Google's 48 000 The company's revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea's exports Yet their disastrous recall of the Galaxy Note 7 with numerous reports of phones spontaneously bursting into flames reveals the dangers of the company's headlong attempt to overtake Apple at any cost A sweeping insider account Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with

The Best of Scobleizer (2011-2012) Robert Scoble, 2013-01-06 This book features a curated compilation of Robert Scoble's best posts from 2011 2012 If you're at all interested in how today's technology is shaping the future and making our lives better you won't want to miss this great collection of posts discussing innovative startups and cool new tech advancements Excerpt from the Book How does Silicon Valley and Apple miss Steve Jobs Well on Monday night I was having dinner with Gary Morgenthaler who was one of the investors in Siri along with a few Siri team members and I heard stories that they weren't able to tell me while Steve Jobs was alive For instance Jobs called Siri management at least 30 times personally in about a month to convince them to join Also Steve Jobs yelled at Apple managers who didn't get why Siri was so important to Apple But most important to me and the book I'm writing with Shel Israel Jobs had already started working with the team on how to make Siri more contextually aware In fact Norman Winarsky who heads up SRI the lab where Siri was developed told me that SRI is about to start testing out a new app that will dig deeper into your email and your calendar to assist you in a much deeper way than Siri can right now What do we meet by context Well Siri today is pretty stupid about what's on your calendar Ask it where is my next meeting and it will show you your next meeting but it doesn't know where it is Close but no cigar It gets worse from there Ask it where is the best place to get lunch tomorrow and Siri answers with places near my home Problem is that tomorrow I'm going to be at the Apple iPhone 5 launch in San Francisco Siri is quite stupid about context location and a bunch of other things Will it improve Apple already announced some improvements to Siri for instance Siri will with iOS 6 be able to start applications But it's hardly expected to be contextually aware in any real way Ask Siri what is my favorite gas station Siri answers I don't know The problem is that isn't really true Apple knows what gas stations I'm most likely to stop at Or it could if it just knew how to contextually evaluate the data that both Verizon and Apple already have streaming from my phone If it doesn't know something like my favorite gas station it certainly doesn't know the answer to something simple like how many times do I eat at Chinese restaurants That's easily verifiable Ask it such a question and it just brings up a list of Chinese restaurants near you It doesn't even try to accurately turn down the question But back to Jobs He saw Siri's potential to add a new simpler contextually aware user interface to any device There are lots of rumors that Apple will use something like Siri in other products like its Apple TV

product In fact at dinner the other night I learned that at least one of the team members that remains at Apple is now working on a secret new project I doubt we ll learn about that tomorrow but I ll be looking for signs that Apple understands how to take us into the contextual age I ll be looking for signs that Steve Jobs passion for Siri is still being listened to **The Best Book On Designing iPhone & iPad Apps** Michael Miller,2012-01-13 For iPhone and iPad users mobile applications are an active part of daily life they help us get half priced cocktails at the neighborhood bar find a nearby pet supply store and keep us up to date on the score of the home team They re being poked at and scrolled through as were rush through subway cars cruise the grocery store or need to pass the time while waiting for an always tardy friend Users who are often on the go use apps with specific objectives in mind and are bounded by certain temporal and physical constraints The Best Book on Designing iPhone and iPad Apps walks experienced and beginning designers through the most important areas to consider when designing an Apple application It delves into and uncovers how to identify and design for the iOS user s specific expectations and needs The eBook highlights successful design elements breaks down iOS device real estate and features and discusses how designers and developers can stay at the forefront of innovation in a quickly and consistently evolving app centered world CHAPTER OUTLINE Letter From The Expert Dear Hopeful App Developer Introduction An ever expanding application library Chapter 1 What s An App From Here To There Chapter 1 Roadmap Chapter 2 What s Apple Got To Do With It From Here To There Chapter 2 Roadmap Chapter 3 Identifying Your Target Audience And Constructing Your Brand From Here To There Chapter 3 Roadmap Who s who Determining your target demographic Chapter 4 Your App Canvas Breaking Down iPhone And iPad Real Estate From Here To There Chapter 4 Roadmap Chapter 5 Application Real Estate From Here To There Chapter 5 Roadmap Chapter 6 Design Time From Here To There Chapter 6 Roadmap Chapter 7 Successful Apps Top 10 Favorite Apps Chapter 8 Marketing Your App From Here To There Chapter 8 Roadmap Conclusion Top 10 Pieces Of Advice ABOUT THE AUTHOR Michael Miller is a Software Quality Consultant specializing in the development of software for iOS devices He has been involved in the development of numerous iPhone and iPad apps in both the retail and education markets including some well known apps representing the mobile presence of Fortune 500 companies Michael started his career in the business management software market but became intrigued with the mobile market when he purchased his first iPod Touch in 2007 When he s not developing and testing he likes trying new cuisines traveling and training his young dog Sawyer As a child he wanted to be an astronaut a dream he hopes to still accomplish one day with the advent of space tourism **Advances in Best-Worst Method** Jafar Rezaei,Matteo Brunelli,Majid Mohammadi,2021-11-10 This book presents recent advances in the theory and application of the Best Worst Method BWM It includes selected papers from the Second International Workshop on Best Worst Method BWM2021 held in Delft The Netherlands from 10 11 June 2021 and provides valuable insights on why and how to use BWM in a diverse range of applications including health energy supply chain management and engineering The book highlights the use of BWM in
