substantially over the last quarter of a century and globalisation is likely to increase it further A tax system which is not competitive by international standards will not support growth Competitiveness is also not a simple matter of tax rates although they have a bearing but of the stability of the system as a whole The report recommends that tax policy should be measured by reference to the following principles Tax policy should be fair support growth and encourage competition provide certainty provide stability be practicable so that a person s tax liability should be easy to calculate and straightforward and cheap to collect be coherent new provisions should complement the existing tax system not conflict with it
