Engineering complex on the basis of a Private Public Partnership PPP is to be seen as the one way out of a global crisis that is increasingly spinning out of control and causes billions of people to suffer from severe malnutrition and supply deficiency. This is particularly regrettable because technological solutions to most if not all segments of the Global Planetary Crisis GPC are meanwhile existing. In order to work towards the solution of the Global Planetary Crisis that increasingly unfolds at all levels of social, political and economic life, an action plan that needs to be endorsed by an omni-national agency and that includes the appointment of a special task committee with the objectives of Future Safeguarding and Infrastructure Completion may be one of the few viable options. Only such an omni-lateral round table agency could inaugurate and authorize a network of economic, political and charitable organizations that may interact in cooperative and synergetic ways to provide the required socio-economic infrastructures, political framework and supply of goods, services and facilities in order to systematically overcome the crisis in all its aspects. The LIFENET system as presented in this compact key issue focused study is meant to be but one potential approach that could lead to true global democratization, power sharing and equalization of living standards worldwide if implemented wholeheartedly. The overarching goal is the complete and uncompromising implementation of the Declaration of Human Rights whereby Art 23 section 2 is seen as most essential in order to physically solve the Global Planetary Crisis. The system builds on the particular complementary strengths of different types of profit and non-profit organizations and their interactive and synergetic potentials to forge a multi-sectoral task force that accumulates the required magnitude and goodwill to physically start solving planetary problems in cooperation with external units and governments.
