Key Features: Build your foundation in Google Cloud with this clearly laid-out step-by-step guide. Get expert advice from one of Google's top trainers. Learn to build flexibility and security into your Google Cloud presence from the ground up. Book Description: From data ingestion and storage through data processing and data analytics to application hosting and even machine learning, whatever your IT infrastructural need, there's a good chance that Google Cloud has a service that can help. But instant self-serve access to a virtually limitless pool of IT resources has its drawbacks. More and more organizations are running into cost overruns, security problems, and simply why is this not working headaches. This book has been written by one of Google's top trainers as a tutorial on how to create your infrastructural foundation in Google Cloud the right way. By following Google's ten-step checklist and Google's security blueprint, you will learn how to set up your initial identity provider and create an organization. Further on, you will configure your users and groups, enable administrative access, and set up billing. Next, you will create a resource hierarchy, configure and control access, and enable a cloud network. Later chapters will guide you through configuring monitoring and logging, adding additional security measures, and enabling a support plan with Google. By the end of this book, you will have an understanding of what it takes to leverage Terraform for properly building a Google Cloud foundational layer that engenders security, flexibility, and extensibility from the ground up. What you will learn: Create an organizational resource hierarchy in Google Cloud. Configure user access permissions and key Google Cloud Platform (GCP) security groups. Construct well-thought-out, scalable and secure virtual networks. Stay informed about the latest logging and monitoring best practices. Leverage Terraform infrastructure as code automation to eliminate toil. Limit access with IAM policy bindings and organizational policies. Implement Google's secure foundation blueprint.
