Reisner,2019-10-21 Beauty in architecture matters again This issue of AD posits that after 80 years of aggressive suppression of engagement with aesthetics the temporarily dormant preoccupation with beauty is back This is evidenced by a current cultural shift from the supposedly objective to an emerging trust in the subjective a renewed fascination for aesthetics supported by new knowledge emanating simultaneously from disparate disciplines Digital design continues to influence architectural discourse not only due to changes in manufacturing but also through establishing meaning The very term post digital was introduced by computational designers and artists who accept that digital gains in architectural design are augmented by human judgement and cognitive intuition The issue takes an interdisciplinary approach to this re emerging interest in beauty across neuroscience neuroaesthetics mathematics philosophy and architecture while discussing the work of the international architects in both practice and academe who are generating new aesthetics Contributors Alisa Andrasek Izaskun Chinchilla Marjan Colletti Peter Cook Robbert Dijkgraaf Winka Dubbeldam David Garcia Graham Harman Claudia Pasquero and Marco Poletto Alan Powers Gilles Retsin Kristina Schinegger and Stefan Rutzinger Fleur Watson and Martyn Hook and Semir Zeki Featured architects Archi Tectonics ecoLogicStudio NaJa deOstos Kazuyo Sejima Ryue Nishizawa SANAA soma architecture Studio Gang John Wardle Architects and Tom Wiscombe Architecture **AHMM** Neil Spiller,2021-05-10 AHMM is a premier international architectural practice Established over 30 years ago it has won

The Landscapists Ed Wall,2020-04-06 Who defines the landscapes around us What practices are employed as contemporary landscapes are produced This issue argues that landscapes are made and remade through interrelations between people and the worlds around them from geographers investigating the lives of urban wastelands to landscape architects projecting future cities and from migrants navigating border systems to artists working with local residents In contrast to tendencies to emphasise the physical forms of landscapes with their potential to be redesigned and represented in drawings this issue brings to the forefront the social constructedness of landscapes by focusing on a range of critical practices and daily actions As conventional frames of landscape are challenged other ways of measuring mapping imagining designing building and occupying them are revealed For centuries artists and designers have represented landscapes of power in paintings and have transformed them through their design proposals But in recent years a number of researchers designers artists and activists have explored an expanded field of landscape investigating populations fleeing conflict zones reimagining cities facing ecological challenges questioning territorial claims and critiquing processes of urbanisation This issue focuses on some of these individuals whose work and lives encompass a diverse range of practices brought together through their critical redefinition of landscape relations Contributors Pierre B langer Harry Bix Neil Brenner and Nikos Katsikis Luis Callejas and Charlotte Hansson James Corner Gareth Doherty and Pol Fit Matamoros Matthew Gandy Christina Leigh Geros Rania Ghosn and El Hadi Jazairy Nina Marie Lister Richard Mosse Kate Orff Toya Peal Neil Spiller Tiago Torres Campos and Tim Waterman Featured practices Advanced Landscape and Urbanism Design Earth East Anglia Records Estudio Teddy Cruz Fonna Forman Furtherfield James Corner Field Operations Larissa Fassler LCLA office OPSYS and SCAPE

Neuroarchitecture Ian Ritchie,2020-12-21 Applying the insights of neuroscience to architecture has the potential to deliver buildings and spaces that measurably promote well being and create healthier or more effective environments for specific activities There is however a risk that neuroarchitecture will become just another buzzword a passing architectural

fashion or a marketing exercise just as eco green and sustainable have become This issue of AD offers the reader an alternative to neuro sound bites and exposes them to the thinking which led to the design of the Sainsbury Wellcome Centre for Neural Circuits and Behaviour SWC a pioneering medical research facility designed to foster collaboration between researchers Multi award winning the SWC was one of the first buildings in the world designed to take into account what has been learned about how the work space affects behaviour and is a highly effective building in which to work Readers will gain a richer deeper insight into the complex mental and existential aspects of architecture design and our many senses how they interact and might interact in the future and how that knowledge can be used to design more effective buildings and built environments

Production Urbanism Dongwoo Yim, Rafael Luna, 2021-09-27 The Industrial Revolution caused a paradigm shift from an agrarian economy to a manufacturing economy giving birth to the industrial city City became synonymous with a concentration of factories causing unfiltered scenes between centres of production and urban dwellings The corrupted image of the city ultimately led to the displacement and separation of production away from residential zones in the 20th century However new innovative manufacturing technologies are allowing a coexistence between factories and dwellings through hybrid typologies that blend production back into the urban fabric This AD issue discusses the implications of the re emergence of production as an architectural and urban agenda through hybrid models that engage a new socioeconomic shift Given the contemporary circumstances of a global pandemic affecting global supply chains it is necessary to deliver a vision for a new productive urbanism that allows autonomous circular economies to flourish Our 21st century cities have an obligation to explore a new industrial revolution of shared economies that optimise the use of the legacy systems infrastructure and building stock Yet it is ultimately up to architecture to take arms in delivering new typologies Contributors Frank Barkow Michele Bonino and Maria Paola Repellino Kristiaan Borret Vicente Gualart Tali

Fok, Antoine Picon, 2017-03-09 Even more than authorship ownership is challenged by the rise of digital and computational methods of design and production These challenges are simultaneously legal ethical and economic How are new methods of fabrication and manufacture going to irreversibly change not only ways of working but also designers ethics and their stance on ownership In his 2013 second term State of the Union address President Obama stated that 3D printing has the potential to revolutionize the way we make almost everything Nowhere will the impact of 3D printing be felt greater than in the architectural and design communities When anyone can print out an object or structure from a digital file will designers still exert the same creative rights or will they need to develop new practice and payment models As architecture becomes more collaborative with open source processes will the emphasis on signature as the basis of ownership remain relevant How will wider teams working globally be accredited and compensated This issue of AD explores this subject it features the work of designers who are developing wholly new approaches to practice by exploring means of commercialising process based products rather than objects Contributors Phil Bernstein Mark Garcia Antoine Picon Carlo Ratti and David Ruy Featured architects Francis Bitonti Marjan Colletti Wendy W Fok Panagiotis Michalatos Jose Sanchez Thibault Schwartz Aaron Sprecher Feng Xu and Philip Yuan **China Homegrown** Andong Lu, Pingping Dou, 2019-02-07 Today architecture in China is at a watershed Over the last decade rapid urbanisation and the burgeoning economy turned the country into a playground for the world's signature architects making it possible to realise extravagant forms and structures at a vast scale The Chinese government has now drawn a line under this phenomenon by issuing a directive calling an end to the oversized xenocentric weird buildings devoid of character or cultural heritage that have sprung up across the country requiring that urban architecture be suitable economic green and pleasing to the eye This government directive comes at a time when homegrown architecture has become increasingly self-assured and reflective in its approach A new generation of architects in China in their 30s and 40s are emerging and in a wholly contemporary way they are exploring local responses to often bewildering urban and rural conditions and serious social and environmental challenges This is often expressed through a revival of interest in traditional street patterns courtyards and gardens At the same time architects are also recognising the opportunities to harness the potential of China's established manufacturing base to develop prefabricated building systems Innovative practices are employing new modes of working such as research-based studio teaching and exhibitions field workshops cross-disciplinary collaboration laboratory-based practice design think tanks and collective projects generating a vibrant culture of design research Contributors Lu Feng Murray Fraser Xiao Fu and Wei You Xiahong Hua and Shen Zhuang Xinggang Li Yichun Liu James Shen Yehao Song Hui Wang Shuo Wang Xin Wang and Qiuye Jin Philip F Yuan and Xiang Wang

Mass-Customised Cities Tom Verebes, 2015-12-07 What happens when computational design and fabrication technologies ramp up to the urban scale Though these innovative production processes are currently now largely limited to small scale design projects what will happen when they are applied to the vast scale of the 21st century world city Could new technologies enable an important shift away from mass production to increasingly bespoke and custom designed systems The introduction of standardisation and mass production processes in the 20th century saw the industrial city take on a repetitious and homogeneous quality through the duplication of component parts Today non standard bespoke systems hold out the promise of realising a distinctive urbanism characterized by the differentiation of serial production and the variation of simple parts that should lead to a more complex and compelling whole Given the current pace and rate of urbanisation in Asia the mass customization of the city is set to have imminent and far reaching practical consequences for the rest of the developing and developed world
