How to Lose Weight with Volumetrics (Setting Up a Volumetric Eating Plan) Serge Uri, 2012-03-12 ABOUT THE BOOK People who want to lose weight are frequently overwhelmed by the large number of diets exercise routines nutritional supplements or certain equipment that are available on the market and online Additionally one may feel that counting calories or reading nutritional value labels on food packages is an endless task and decreases their motivation to succeed Barbara Rolls an accomplished nutrition professor at Penn State University recognized the need for a well structured comprehensive and easy to understand approach to weight loss and healthy nutrition She designed a great weight loss diet called Volumetrics that eliminates the need to count calories which lowers stress levels enhances a one's self confidence and provides several nutritional principles that may be applied immediately These principles do not require extensive preparation or reading EXCERPT FROM THE BOOK The reason why energy density and food volume are important when it comes to weight loss is because of our digestive system physiology and the regulation of appetite The brain centers which are responsible for appetite and food intake receive continuous feedback from certain nervous receptors located in the stomach walls These nerve endings do not effectively react to food composition but they do respond to food volume This means that stomach receptors do not distinguish between a certain volume of potatoes or the same volume of cheese Obviously cheese contains more fat and thus more calories However your brain has no way of knowing the energetic density of cheese it receives data only about its volume When we eat and food reaches our stomach the nerve receptors are stimulated by the stretch of stomach walls which depends on pressure created by food volume The stomach is abundant in nerves which send nervous signals to brain centers that regulate appetite and food intake When pressure created by food volume reaches a certain threshold the brain sends inhibitory signals that decrease the appetite and reduce the food intake This translates into a sensation of satiety and disappearance of hunger Dr Rolls believes that increasing the consumption of foods with very low and low energy density allows a person to limit the amount of calories and lose weight without the need to monitor calories and perform various calculations The author illustrates the relationship between dietary energy density and energy intake in a 2009 research study conducted at the Department of Nutritional Sciences Pennsylvania State University This makes the Volumetrics diet easy to apply into daily nutrition by putting the advice into practice quickly and effectively Buy a copy to keep reading CHAPTER OUTLINE How to Lose Weight with Volumetrics Introduction Why Is Weight Management Important What is Energy Density of Foods How Does The Volumetrics Diet Work and much more **Fitbit For Dummies** Paul McFedries, 2019-06-10 Take a complete tour of the Fitbit ecosystem From Fitbit features to the Fitbit app to the social features of Fitbit.com this approachable book covers everything you need to know to get the most out of your Fitbit wristband or watch Whether you're a fitness newcomer a regular walker or a long time exerciser your Fitbit is a powerful device that can tell you much more than how many steps you take each day This book offers easy to follow step by step

instructions for tracking all that data and getting the most out of your Fitbit investment Go beyond steps to track sleep heart rate weight and more Set up your health and fitness goals then go for them Connect to third party apps such as Strava and Weight Watchers Stay motivated by sharing your activities with friends It s one thing to simply wear your Fitbit but it s quite another to use your Fitbit to reach your personal health goals Whether that goal is to get fit lose weight eat better or reduce stress your Fitbit has settings and features that can help you get there And this book shows you how Handbook of Obesity Treatment Thomas A.
