Pro Web 2.0 Mashups Raymond Yee, 2008-04-25 How many times have you seen a web site and said This would be exactly what I wanted if only If only you could combine the statistics here with data from your company s earnings projections If only you could take the addresses for those restaurants and plot them on one map How often have you entered the date of a concert into your calendar with a single click instead of retyping How often do you wish that you could make all the different parts of your digital world your e mail your word processor documents your photos your search results your maps your presentations work together more seamlessly After all it s all digital and malleable information shouldn t it all just fit together In fact below the surface all the data web sites and applications you use could fit together This book teaches you how to forge those latent connections to make the Web your own by remixing information to create your own mashups A mashup in the words of the Wikipedia is a web site or web application that seamlessly combines content from more than one source 1 into an integrated experience Learning how to draw content from the Web together into new integrated interfaces and applications whether for yourself or for other others is the central concern of this book Instant Google Map Maker Starter Limoke Oscar, 2013-03-18 Get to grips with a new technology understand what it is and what it can do for you and then get to work with the most important features and tasks This is a practical example rich Starter which helps you with the skills needed to learn Google Map Maker This book is intended for those who would like to understand how Google maps are created and are interested in creating their own maps in Google Map Maker No special skills or system requirements are necessary You will very quickly understand how the Google Map Maker platform and community work and have your own map edits by the end of your read You will also find useful communities and social media personalities to follow

Invocational Media Chris Chesher, 2023-10-19 Invocational Media critiques the sociotechnical power of digital technologies by introducing the concept of invocational media What is an invocation Ask your voice assistant and it will define it for you It is a media artefact that responds to many invocations such as seeking the weather forecast requesting any song you can name or turning on the lights almost magically This contemporary manifestation of the ancient practice of invocation gives an immediate response to your call in a way that Chris Chesher argues is the characteristic power of all computers which he redefines as invocational media This book challenges the foundations of computer science by offering invocation as a powerful new way of conceptualising digital technologies Drawing on media philosophy Deleuze Guattari Heidegger Latour Austin Innis and McLuhan it critiques the representationalism of data processing artificial intelligence and virtual reality Invocational media seem to empower individuals but necessarily subject users to corporate and government monopolies of invocation They offer many solutions but only by reducing everything to the same kind of act They complicate agency in their indifference as to whether invokers are human or non human With robotics they invoke material form to act physically and autonomously People willingly make themselves invocable to surveillance and control by creating their own

profiles and marking themselves with biometrics This ground breaking book will change how you think about digital media by showing they are in fact invocational media
