Who's #1? Amy N. Langville, Carl D. Meyer, 2013-12-01 The mathematics behind today's most widely used rating and ranking methods. A website's ranking on Google can spell the difference between success and failure for a new business. NCAA football ratings determine which schools get to play for the big money in postseason bowl games. Product ratings influence everything from the clothes we wear to the movies we select on Netflix. Ratings and rankings are everywhere, but how exactly do they work? *Who's #1* offers an engaging and accessible account of how scientific rating and ranking methods are created and applied to a variety of uses. Amy Langville and Carl Meyer provide the first comprehensive overview of the mathematical algorithms and methods used to rate and rank sports teams, political candidates, products, Web pages, and more. In a series of interesting asides, Langville and Meyer provide fascinating insights into the ingenious contributions of many of the field's pioneers. They survey and compare the different methods employed today, showing why their strengths and weaknesses depend on the underlying goal and explaining why and when a given method should be considered. Langville and Meyer also describe what can and can't be expected from the most widely used systems. The science of rating and ranking touches virtually every facet of our lives, and now you don't need to be an expert to understand how it really works. *Who's #1* is the definitive introduction to the subject. It features easy-to-understand examples and interesting trivia and historical facts, and much of the required mathematics is included. **The United States Football League, 1982-1986** Paul

Reeths, 2017-03-21 One of the most ambitious and short-lived endeavors in professional sports history, the United States Football League was founded in 1982. Premiering with a spring schedule and an abundance of talent that included top rookies and National Football League veterans, the USFL gained national attention with broadcast and cable television contracts, controversial player signings, ownership battles, and an unsuccessful billion-dollar lawsuit against the NFL. The USFL folded after four years, yet represented the last major challenge to America's big four sports leagues: the NFL, the National Basketball Association, the National Hockey League, and Major League Baseball. Based upon extensive research and interviews with owners, coaches, players, and administrators, this book chronicles the league's formation, its three seasons of play, and its long-term effects on pro sports.

Sport, Spirituality, and Religion Tracy J. Trothen, 2019-11-22 The research studies included in this Special Issue highlight the fundamental contribution of the knowledge of environmental history to conscious and efficient environment conservation and management. The long-term perspective of the dynamics that govern the human climate ecosystem is becoming one of the main focuses of interest in biological and earth system sciences. Multidisciplinary bio-geo-archaeo investigations into the underlying processes of human impact on the landscape are crucial to envisage possible future scenarios of biosphere responses to global warming and biodiversity losses. This Special Issue seeks to engage an interdisciplinary dialog on the dynamic interactions between nature and society, focusing on long-term environmental data as an essential tool for better informed landscape management decisions to achieve an equilibrium.

Standing on the Edge of Your Tomorrow Take Charge and Win! Robert Lee, 2010-05-01 The Buzzing Bee Once we left the patio door open a bee flew in It hit the window repeatedly trying to get out We could hear it buzzing from the top to the bottom of the window It saw the beauty outside and worked very hard trying to get out but we knew that its effort was futile If it were a fly we would have used the swatter and ended its misery However since it is a beneficial insect we opened the door and chased it out All of a sudden four important lessons came to mind 1 Hard work alone may not be able to solve our problem 2 Often the solutions come from doing it another way thinking outside the box 3 Sometimes the Almighty sees us in our predicament and shows us a way out 4 I believe that it is our mission in life

also to show some struggling people the lessons we learned and the opportunities we saw and show them a way out Two roads diverge in the woods and I took the one less traveled and that has made all the difference Robert Frost 1920 Give the world the best you have and it may never be enough Give the world the best you've got anyway Mother Teresa 1910-1997 Any fool can count the seeds in an apple Only God can count the apples from one seed Dr Robert H Schuller **The Michigan Alumnus**, 1945 In v 1 8 the final number consists of the Commencement annual **A History of NFL Preseason and Exhibition Games** Mark L.
