Social Media in the Fashion Industry Patricia SanMiguel, Tekila Harley Nobile, Cristina Sánchez-Blanco, Nadzeya Sabatini, 2024-10-07 This book introduces social network fundamentals in the fashion domain. It addresses the creation of social media marketing plans highlighting strategic approaches that allow fashion brands to differentiate themselves in the ephemeral and challenging fashion context. Through a variety of academic and professional sources and by sharing the results of their own research, the authors present research methodologies including netnography, visual sentiment, and argumentation analysis for developing rigorous studies to gain social media insights that can be useful for decision making and value creation. The book also discusses future trends regarding social media management in the fashion domain via interviews with senior fashion experts. This cutting edge book that combines theory and practice will appeal to undergraduate and master students across a broad range of fields including fashion studies, marketing, digital marketing, and communication, and to young professionals who are starting to work in social media. In addition, this book is also developed for young researchers and PhD students employing social media analysis in their studies.

Critical Minerals, the Climate Crisis and the Tech Imperium Sophia Kalantzakos, 2023-02-28 This book examines the latest manifestations of resource competition. The energy transition and the digitalization of the global economy are both accelerating, even as geopolitics driven by Sino American hyper competition become increasingly contentious. The volume brings together an interdisciplinary group of scholars, policy makers, institutional stakeholders, and industry experts to analyze not only the transition itself but also the implications that the need for uninterrupted access to unprecedented levels of raw materials generates. By framing the challenges ahead for global society, governance, industry, international power politics, and the environment, the book asks hard questions about the choices that need to be made to reach net zero by mid century. Moreover, it sheds light on different facets of the growing risks to what have been global interdependent supply chains in a way that is nuanced, balanced, and practical, thus pushing back on some of the most sensational headlines that breed confusion and may lead policymakers to make more narrow and less effective decisions. The volume is an outcome of Rich Rocks the Climate Crisis and the Tech Imperium, a Summer Institute at Caltech and the Huntington that took place in July 2021.
