Using Generative AI for SEO Eric Enge, Adrián Ridner, 2025-07-02 Generative AI has brought artificial intelligence into the mainstream. The natural language capabilities of this technology provide digital marketers with exciting new ways to use AI in their day to day operations. Yet few SEO practitioners understand how to integrate this capability into their business. Using Generative AI for SEO is the first authoritative book dedicated to helping SEO practitioners effectively incorporate generative AI into their work. No matter where you are in your SEO journey it's critical to get started so that your organization can gain a competitive advantage. This book provides the necessary background knowledge, skills, and practical examples to get you working quickly and confidently with this essential new tool. Understand how generative AI can help you impact SEO. Explore practical applications you can use right now. Learn the competencies you'll need to ensure your toolkit remains relevant. Improve content creation throughput while improving quality. Consider risks and limitations of AI applications in SEO. Build a generative AI capability within your organization.

AI Will Take Your Job, and It's for the Best Jeff Schatten, Teresa Aires, 2025-04-17 AI Will Take Your Job and It's for the Best examines how AI will free people from mundane tasks, allowing them to pursue more meaningful and creative roles. It's more than a forecast; it's a guide to thriving in the age of AI and embracing the radical new social contract it requires.

19th International Conference on Cyber Warfare and Security Prof Brett van Niekerk, 2024-03-25 These proceedings represent the work of contributors to the 19th International Conference on Cyber Warfare and Security (ICCWS 2024) hosted by the University of Johannesburg, South Africa, on 26-27 March 2024. The Conference Chair was Dr Jaco du Toit, University of Johannesburg, South Africa, and the Program Chair was Prof Brett van Niekerk from Durban University of Technology, South Africa. ICCWS is a well-established event on the academic research calendar, and now in its 19th year, the key aim remains the opportunity for participants to share ideas and meet the people who hold them. The scope of papers will ensure an interesting two days. The subjects covered this year illustrate the wide range of topics that fall into this important and ever-growing area of research.

How You Can Profit from Credit Cards Curtis E. Arnold, 2008-06-06 Who would not be interested in getting an interest-free loan for 12 months for any type of purchase just for taking a few minutes to complete a credit card balance transfer offer? Or a free round-trip airline ticket twice a year just for making purchases on a rebate card? Or lowering their insurance premiums by hundreds of dollars a year just by raising their credit score? Obviously, just about every consumer is interested in saving money and getting freebies. Hence the universal appeal of this book cannot be overstated. Today the average American household has 12.7 credit cards. Banks maximize their profits by nickel and diming and outsmarting their cardholders; that's why credit cards are their most profitable product. Banks spend billions enticing consumers with rebates, freebies, low introductory rate offers, and airline miles. Learn how to take full advantage of these offers without paying for them through brutally high interest rates, fees, and penalties. Arnold offers specific advice targeted to young consumers who are being aggressively targeted by credit card
