Performing Media Activism in the Digital Age breaks new ground by conceptualizing activism as a performance extending beyond public space and the moment of public gatherings to consider the more extended view of social or political movements as mediated social connections The book utilizes primary data extracted from social media platforms by applying a social network analysis SNA approach to the people organizations and media that are trying to advance their particular agendas with an eye toward a better understanding of the ways in which social movements operate in a networked society The goal of social network analysis is to identify social structures within a movement such as communities or clusters and it seeks to locate influence within those structures Social network analysis as applied to media activism represents an interdisciplinary field that encompasses social psychology sociology as well as graph theory which should suggest this book will be of interest to scholars and students in these and related fields In the digital age social network analysis represents a paradigm shift as analytical and data visualization tools can be applied in an interdisciplinary manner By combining data science and sociology or cultural anthropology one has the means to visualize networks of individuals and organizations engaged in a social movement to see how movements are organized structured into communities clusters and niches and to visualize power structures within social movements to see who is influencing a network over extended periods of time

Misinformation Matters Uyiosa Omoregie, Kirsti Ryall, 2023-04-19 What is misinformation Why does it matter How does it spread on the internet especially on social media platforms What can we do to counteract the worst of its effects Can we counteract its effects now that it is ubiquitous These are the questions we answer in this book We are living in an information age specifically an algorithmic age which prioritizes information quantity over quality Social media has brought billions of people from across the world together online and the impact of diverse platforms such as Facebook WeChat Reddit LinkedIn Signal WhatsApp Gab Instagram Telegram and Snapchat has been transformational The internet was created with the best of intentions as an online space where written content could be created consumed and diffused without any real intermediary This empowering aspect of the web is still mostly a force for good People on the whole are better informed and online discussion is more inclusive because barriers to participation are reduced As activity online has grown however an expanding

catalogue of research reveals a darker side to social media and the internet generally. Namely misinformation's ability to negatively influence our behaviour both online and offline. The solution we provide to this growing dilemma is informed by Ludwig Wittgenstein's *Tractatus Logico Philosophicus* which examines the relationship between language and reality from a philosophical perspective and complements Claude Shannon's Information Quantity Theory which addresses the quantification, storage and communication of digital information from a mathematical perspective. The book ends by setting out a model designed by us, a Wittgensteinian approach to information quality. It defines content published online by clarifying the propositions and claims made within it. Our model's online information quality check allows users to effectively analyse the quality of trending online content. This approach to misinformation analysis and prevention has been designed to be both easy to use and pragmatic. It upholds freedom of speech online while using the harm principle to categorise problematic content.
